

# WordPress Block Editor: Heading Block

WordPress Training

Tutorial Contents

This tutorial is part of our series on [How To Use The WordPress Block Editor \(Gutenberg\)](#).

- To learn more about using the WordPress block editor interface, go here: [The WordPress Block Editor – Content Area](#)
- To learn more about using blocks, see this tutorial: [How To Use WordPress Block Editor Blocks](#)

\*\*\*

## Heading Block – Description

---

Headings are normally used to indicate the start of a new section or topic. The *Heading block* lets you introduce new sections and organize content around topics to help visitors (and search engines) better understand your content structure.

# This Is My Page Title

🔖 ⋮ ↕ H1 ≡ B / ↻ ∨ ⋮

Lorem H1 H2 H3 H4 H5 H6 Sit Amet  
Heading 1

Donec eu vehicula dolor. Fusce vitae nisi id leo luctus tempor et at orci. Cras eu nibh tincidunt, molestie leo ac, euismod mi.

Donec nec sagittis mauris. Quisque neque nibh, laoreet a tincidunt vitae, facilisis a nunc. Sed in interdum dui.

Add headings to your posts and pages with Heading blocks.

## How To Use The Heading Block

---

In this section, we'll cover:

- How to add a Heading block to your content.
- How to edit and configure your Heading block and block settings.
- How to remove the Heading block from your content.

For more details on using blocks (e.g. how to move blocks around your content), see this tutorial: [How To Use Blocks](#).

## Adding A Heading Block

---

To add a *Heading block*:

- Either:
  - Click on the 'Add Block' tool in the **Editing Toolbar** section and select the Heading block (in *Most Used* or *Text* section),
  - Add the Heading block in the **Content Area**.
- Type or paste in your heading.
- Use the tools in the *Heading Block Editor* or *Block Settings* section to edit and format your heading.

Let's go through the above steps.

First, create a new post or page or open an existing post or page and either:

Click on the Add Block tool and select a Heading block...

Add a Heading block to your posts and pages using the Add Block tool.

Or, select a Heading block using the **Insertion tool** in the Content Area.

Use the Inserter tool to add a Heading block to your content.

Either of the above methods will add a Heading block to your content.

Heading block (no heading added).

After adding a Heading block, simply type or paste in your heading.

🔖	⋮	^	H1	≡	B	/	↺	∨	⋮
---	---	---	----	---	---	---	---	---	---

# Lorem Ipsum Dolor Sit Amet

Donec eu vehicula dolor. Fusce vitae nisi id leo luctus tempor et at orci. Cras eu nibh tincidunt, molestie leo ac, euismod mi.

Heading

Heading block with heading added.

Go through your post or page and select different heading levels (H1-H6) for different sections of your content.

# This Is My Page Title

## Lorem Ipsum Dolor Sit Amet

Donec eu vehicula dolor. Fusce vitae nisi id leo luctus tempor et at orci. Cras eu nibh tincidunt, molestie leo ac, euismod mi.

Donec nec sagittis mauris. Quisque neque nibh, laoreet a tincidunt vitae, facilisis a nunc. Sed in interdum dui.

Curabitur quis tellus leo. Nullam id dapibus massa. Pellentesque in nunc sit amet erat bibendum volutpat. Duis orci odio, aliquet nec accumsan non, auctor lobortis velit. Fusce tristique erat auctor odio porttitor posuere.

Select different heading levels for your content.

Repeat this process for all your content headings.

# H1 **Lorem Ipsum Dolor Sit Amet**

Donec eu vehicula dolor. Fusce vitae nisi id leo luctus tempor et at orci. Cras eu nibh tincidunt, molestie leo ac, euismod mi.

Donec nec sagittis mauris. Quisque neque nibh, laoreet a tincidunt vitae, facilisis a nunc. Sed in interdum dui.

### H3 **Vivamus varius magna**

Curabitur quis tellus leo. Nullam id dapibus massa. Pellentesque in nunc sit amet erat bibendum volutpat. Duis orci odio, aliquet nec accumsan non, auctor lobortis velit. Fusce tristique erat auctor odio porttitor posuere.

##### H5 **Nunc velit metus**

Praesent enim mauris, ultrices in interdum a, gravida sit amet mauris. Proin lacinia dictum posuere. Nulla malesuada nibh sed est molestie luctus. Aenean semper sagittis libero at interdum. Nunc velit metus, luctus non

Add various heading levels to your content.

#### Notes:

- The Heading block supports all HTML heading tags (H1 – H6).
- The Heading block also supports *HTML Anchors* (also referred to as *Jump Links* – see further below).
- By default, heading styles are determined by your site's theme. you can also customize heading styles if you have knowledge of using CSS (Cascading Style Sheets).

After adding headings to your content:

- Edit and configure Heading block settings,
- Save, publish, or update your post or page.

## How To Edit A Heading Block

To edit a Heading block:

- Click inside the Heading block to select it.
- Use the *Block Editor* tools to:
  - Change the heading Level (H1 – H6)
  - Change the heading alignment (left, center, right)
  - Format the text (bold, italics, strikethrough, etc.)
  - Add a hyperlink or jump link to your heading.
- Use the *Block Settings* to:
  - Change the heading's typography (font size and line height).
  - Change the heading's color settings (text color, background color).
  - Create an HTML anchor (see further below) or style your heading using CSS.

Let's go through some of the editing functions of the Heading block.

After adding a heading using the Heading block, you can change its text or background color.

The image shows a WordPress page editor interface. On the left, a heading block is selected, displaying the text "This Is My Page Title" in a large, bold, black font. Below it, the text "Lorem Ipsum Dolor Sit Amet" is shown in a smaller, brown font. The heading block's settings panel is open on the right, showing the "Heading" section with a description: "Introduce new sections and organize content to help visitors (and search engines) understand the structure of your content." The "Typography" section is expanded, showing "Font size" set to "Default" and "Custom" set to an empty field. A color picker is open, showing a red-to-black gradient and a color value of "#4c3535". Below the color picker, there are several color swatches and a "Background Color" section with more swatches and a "Custom color" button.

Change Heading block color settings.

You can also change the size of the font and line spacing in the Typography section. Click the 'Reset' button to return your heading to its default setting.

The image shows a WordPress editor interface. On the left, a heading block is displayed with a dark red background. The heading text is "This Is My Page Title" in a large, bold, black font. Below the heading, there is a dark red rectangular area with the text "Lorem Ipsum Dolor Sit Amet" in a white, bold font. To the right of this area is a small image of a desk with a laptop, a coffee cup, and some plants. Below the image, there are two paragraphs of placeholder text: "Donec eu vehicula dolor. Fusce vitae nisi id leo luctus tempor et at orci. Cras eu nibh tincidunt, molestie leo ac, euismod mi." and "Donec nec sagittis mauris. Quisque neque nibh, laoreet a tincidunt vitae, facilisis a nunc. Sed in interdum dui." Below the paragraphs is another heading block with the text "Vivamus varius magna" in a bold, black font. Below this heading is another paragraph of placeholder text: "Curabitur quis tellus leo. Nullam id dapibus massa. Pellentesque in nunc sit amet, eget bibendum volutpat. Duis sed odio, aliquet nec sagittis non, suscipit". On the right side of the editor, a sidebar is visible with the "Heading" section selected. The sidebar contains the following settings: "Heading" (introduce new sections and organize content to help visitors (and search engines) understand the structure of your content.), "Typography" (Font size: Default, Custom; Line height: 1.5), "Color settings" (a dark red color swatch), and "Advanced" (a dropdown menu).

Change typography settings in your Heading block.

## HTML Anchor

An HTML anchor lets you add “jump links” in your content pointing to different sections of your page (e.g. like in a Table of Contents).

[Lorem ipsum dolor](#) sit amet, consectetur adipiscing elit. Donec eu vehicula dolor. Fusce vitae nisi id leo luctus tempor et at orci. Cras eu nibh tincidunt, molestie leo ac, euismod mi. Donec nec sagittis mauris. Quisque neque nibh, laoreet a tincidunt vitae, facilisis a nunc. Sed in interdum dui. Curabitur quis tellus leo. Nullam id dapibus massa. Pellentesque in nunc sit amet erat bibendum volutpat. Duis orci odio, aliquet nec accumsan non, auctor lobortis velit. Fusce tristique erat auctor odio porttitor posuere.

Fusce vitae mauris ac orci interdum efficitur. Donec cursus quam urna, sit amet interdum ipsum imperdiet ac. Nullam aliquam, ex ut aliquam luctus, tellus tortor tincidunt nisl, eu lacinia magna ligula eu elit. Ut congue ullamcorper porttitor. Duis nec tristique augue. Curabitur id

Add jump links to Heading blocks in your content.

To create an HTML anchor:

- Click inside the Heading block of the section you want visitors to jump to when they click on an anchor link.
- In the **Advanced Settings > HTML Anchor** section of the Heading block settings, type in a unique anchor by entering one or two words without spaces (you can use hyphens to separate words).

For example, in the screenshot below we have created an HTML anchor using the text *'main-title'*...

fames ac turpis egestas.

🏠 ⋮ ⬆ **H1** ≡ **B** / ↺ ⌵ ⋮

# Lorem Ipsum Dolor Sit Amet

Donec eu vehicula dolor. Fusce vitae nisi id leo luctus tempor et at orci. Cras eu nibh tincidunt, molestie leo ac, euismod mi.

**Advanced** ⤴

HTML anchor

Enter a word or two — without spaces — to make a unique web address just for this heading, called an “anchor.” Then, you’ll be able to link directly to this section of your page.

[Learn more about anchors](#) 🔗

Additional CSS class(es)

Separate multiple classes with spaces.

The next step is to connect the anchor you’ve added in your Heading block to your page.

To do this:

- Select and highlight text in your content and click on the Hyperlink tool in the Heading block editor.
- Add the anchor name into the URL field preceded by a ‘hash’ symbol (#). In our example, this is ‘*#main-title*’ (without the quote symbols).
- Make sure your anchor text matches the one created in the block’s advanced settings section.
- Click the Enter button to create the link.
- Save and publish or update your post or page.

# This Is My Page Title

[Lorem ipsum dolor](#)

Add an anchor link to your content.

Now, when users click on the text containing your Anchor link, they will be taken to the section of the page you have marked with an HTML anchor.

For more information about linking content on your site, see this tutorial: [How To Link Content In WordPress](#)

You can easily convert a **Paragraph Block** into a Heading block if you know how to use **WordPress keyboard shortcuts**.

Start writing or type / to choose a block

Convert paragraphs into headings using keyboard shortcuts.

Remember to update and publish your post or page to save your settings.

## How To Remove A Heading Block

---

To delete or remove a heading block:

- Click inside the Heading block to select it.
- Select the 'More Options' tool in the Block Editor.
- Click on 'Remove block'.
- This will remove the Heading block from your content.

Use the More Options menu to remove a Heading block from your content.

*Additionally...*

- You can reposition your block using the 'Move Up' and 'Move Down' arrows or the Drag and Drop handle tool (if you need help with this step, see our tutorial on [How To Use Blocks](#)).
- You can also convert a Heading block into a [Reusable block](#).

## Heading Block Tools, Options & Settings

---

The *Heading block* includes tools, options, and settings for:

- Heading Block Editor
- Heading Block Settings

### Heading Block Editor

---

Heading block editor.

The *Heading Block Editor* includes tools that let you perform the following operations:

- **Change Block Type** (See ‘*Heading Block – Additional Info*’ section below.)
- **Drag & Drop Tool**
- **Move Up and Down Tool**
- **Change Heading Level**
  - H1
  - H2
  - H3
  - H4
  - H5
  - H6
- **Change Alignment**
  - Align text left
  - Align text center
  - Align text right
- **Bold** – Add bold text formatting to your file’s link text.
- **Italic** – Add italicized text formatting to your file’s link text.
- **Link Tool** – Link and unlink text in your heading.
  - Custom URL* – Paste a URL or type a search term to bring up a list of posts, pages, or custom post types on your site containing your search term.
    - Clicking on the *Link settings* button brings up the following options:
      - Open the link in a new tab (on/off).
    - Apply button. Once the Apply button is clicked, your link displays the following additional options:
      - View the link.
      - Edit the link.
      - Delete the link.

- **More Rich Text Controls** – See [How To Use Blocks](#) to learn more about using rich text control settings.
- **More Options** – See [How To Use Blocks](#) to learn how to use this section.

## Heading Block Settings

The image shows a screenshot of the WordPress heading block settings panel. The panel is titled "Post Block" and contains the following sections:

- Heading**: A section with a heading icon and a description: "Introduce new sections and organize content to help visitors (and search engines) understand the structure of your content."
- Typography**: A section with a chevron icon. It includes a "Font size" dropdown menu (set to "Default"), a "Custom" input field, and a "Reset" button. Below it is a "Line height" input field (set to "1.5").
- Color settings**: A section with a chevron icon. It includes a "Text Color" section with a grid of color swatches and a "Custom color" button. Below it is a "Background Color" section with a grid of color swatches and a "Custom color" button.
- Advanced**: A section with a chevron icon.

Red annotations with arrows point to the following parts of the panel:

- Heading Block Description**: Points to the heading description text.
- Typography**: Points to the typography settings section.
- Color Settings**: Points to the color settings section.
- Advanced Settings**: Points to the advanced settings section.

Heading block settings.

Heading block settings include:

- **Block description area**
- **Typography**
  - *Font Size*
    - Default
    - Small
    - Normal
    - Medium
    - Large
    - Huge
    - Custom
  - *Custom font size*
    - Value field – Enter a value in points
    - Reset – Resets font size to default.
  - *Line height* – Enter a line height value (decimal values allowed, e.g. 2.5)
- **Color Settings** – Select from the preset color palette or add a custom color using hexadecimal or RGB values. Click the Clear button to restore the default text color.
  - *Text color*
  - *Background color (Solid/Gradient)*
- **Advanced Settings**
  - *HTML Anchor* – Create a unique web address to send users directly to the block using a unique jump link URL. To learn more about using HTML Anchors, see our tutorial on **How To Use Blocks**.
  - *Additional CSS Class(es)* – This field lets you add multiple CSS classes to your block separated with spaces. This allows you to write custom CSS and style the block as you see fit. Note: This requires having knowledge of CSS (Cascading Style Sheets).

## Heading Block – Additional Info

---

You can convert a *Heading block* into the following block types:

Change your Heading block into other block types.

Installing **plugins** or **themes** on your site may also add new functionality, options, or settings to the Heading block.

# Lorem Ipsum Dolor Sit Amet

Donec eu vehicula dolor. Fusce vitae nisi id leo luctus tempor et at orci. Cras eu nibh tincidunt, molestie leo ac, euismod mi.

Donec nec sagittis mauris. Quisque neque nibh, laoreet a tincidunt vitae, facilisis a nunc. Sed in interdum dui.

## Vivamus varius magna

Curabitur quis tellus leo. Nullam id dapibus massa. Pellentesque in nunc sit amet erat bibendum volutpat. Duis orci odio, aliquet nec accumsan non, auctor lobortis velit. Fusce tristique erat auctor odio porttitor posuere.

### Nunc velit metus

Praesent enim mauris, ultrices in interdum a, gravida sit amet mauris. Proin lacinia dictum posuere. Nulla malesuada nibh sed est molestie luctus. Aenean semper sagittis libero at interdum. Nunc velit metus, luctus non

Congratulations! Now you know how to use the WordPress content editor's **Heading block**.
