## Latest Posts Block – Description

---

The *Latest Posts block* lets you display a list of your site's most recent posts in your content.

## Lorem Ipsum Saladium

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean quis nisi varius ipsum dignissim hendrerit. Sed nec dolor eget est convallis facilisis ac non felis.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Cras rutrum, eros vitae suscipit cursus, sem lectus faucibus sapien, eget iaculis felis quam in nulla.

Etiam sagittis volutpat bibendum.

Lorem Ipsum Saladium

[Betroot, Pear And Word Salad](#)

[Paleo Drome Soup Puos Emord Oelap](#)

[Figuring Out The Fig Salad](#)

[Mumbo Jumbo Gumbo Salad](#)

[Mad Bad Dad Salad](#)

← **Latest  
Posts**

Aliquam erat volutpat. In tincidunt purus id congue rhoncus.

Display your latest posts using the Latest Posts block.

The Latest Posts block also makes it easier for visitors to see what's new on your blog.

## How To Use The Latest Posts Block

---

In this section, we'll cover:

- How to add a Latest Posts block to your content.
- How to edit and configure your Latest Post block and block settings.
- How to remove the Latest block from your content.

For more details on using blocks (e.g. how to move blocks around your content), see this tutorial: [How To Use Blocks](#).

## Adding A Latest Posts Block

---

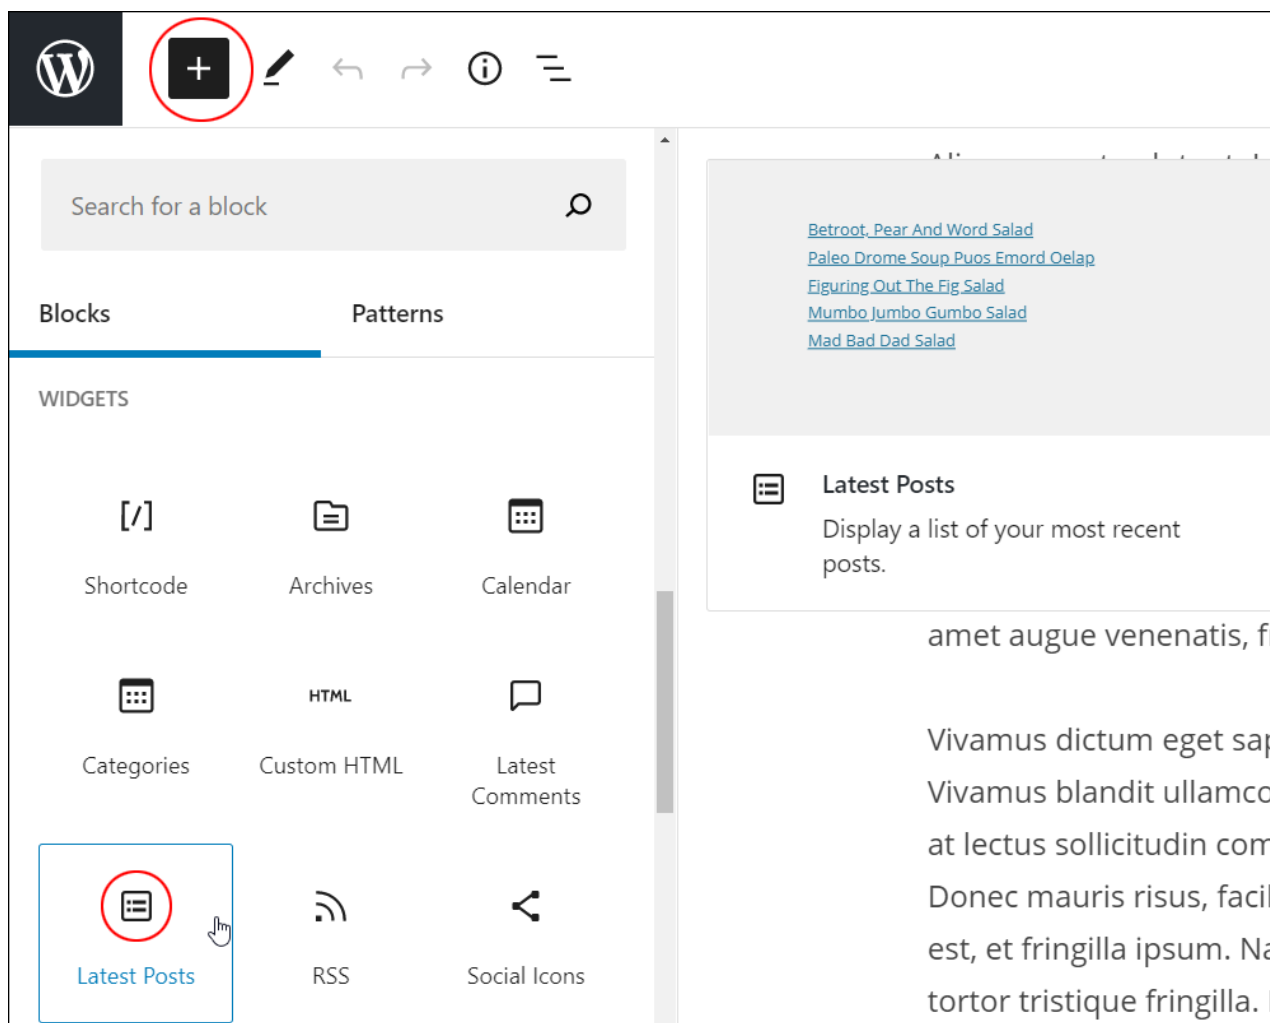

To add a *Latest Posts block*:

- Either:
  - Click on the 'Add Block' tool in the **Editing Toolbar** section and select the Latest Posts block (in *Most Used* or *Widgets* section),
  - Add the Latest Posts block in the **Content Area**.
- Use the tools in the *Latest Posts Block Editor* or *Block Settings* section to align and configure your Latest Posts content.

Let's go through the above steps.

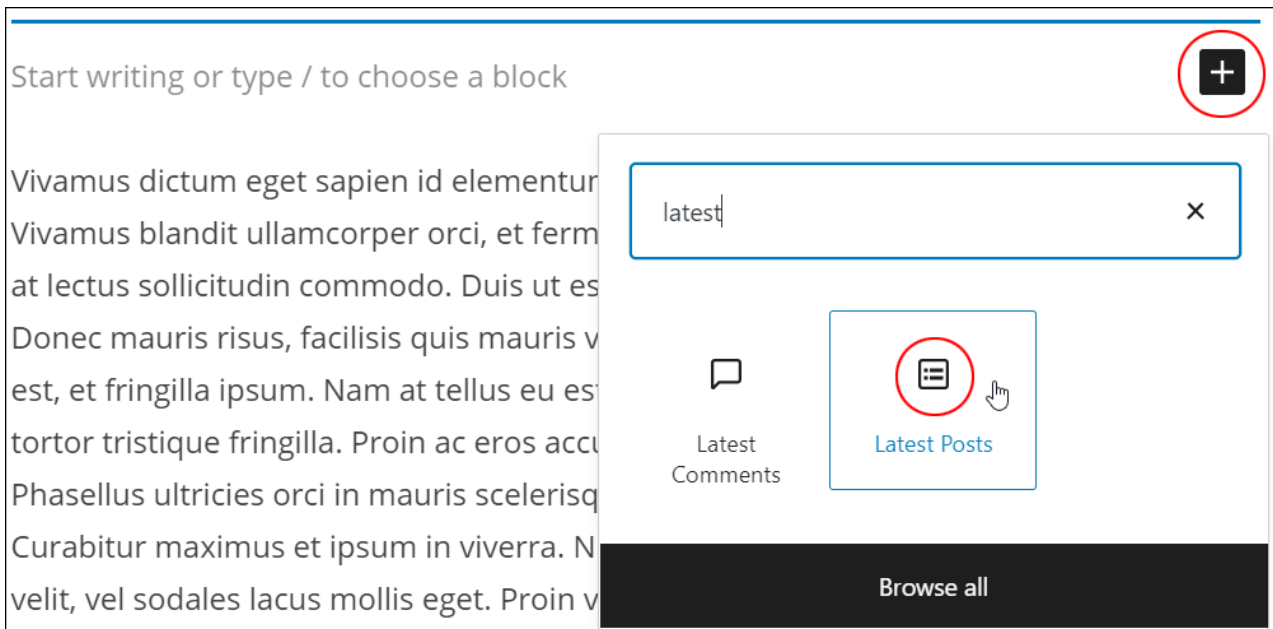

First, create a new post or page or open an existing post or page and either:

Click on the Add Block tool and select a Latest Posts block...

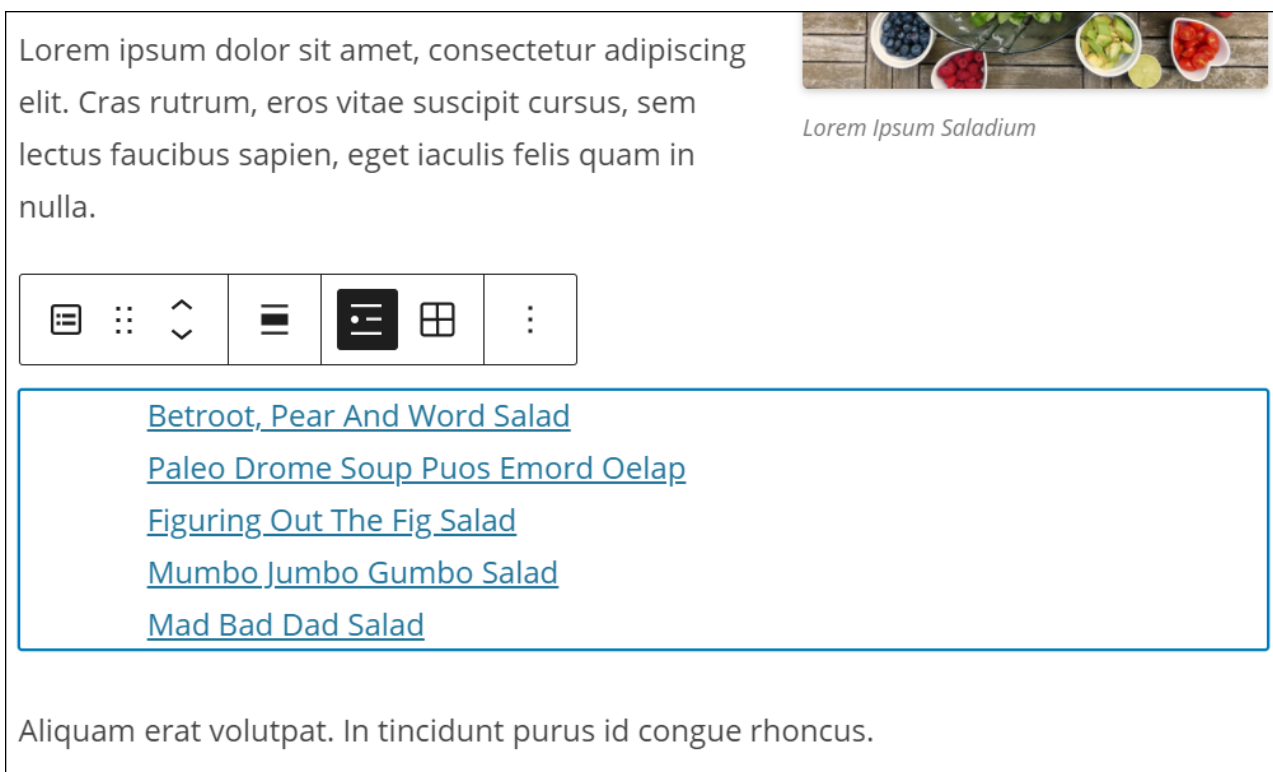

Use the Add Block tool to insert a Latest Posts block into your content.

Or, select a Latest Posts block using the **Insert** tool in the Content Area.

Add a Latest Posts block to your content using the Inserter tool.

Either of the above methods will add a Latest Posts block to your content.

Latest Posts block added to the content.

After adding a Latest Posts block to your content, you can:

- Edit and configure block settings,
- Save, publish, or update your post or page.

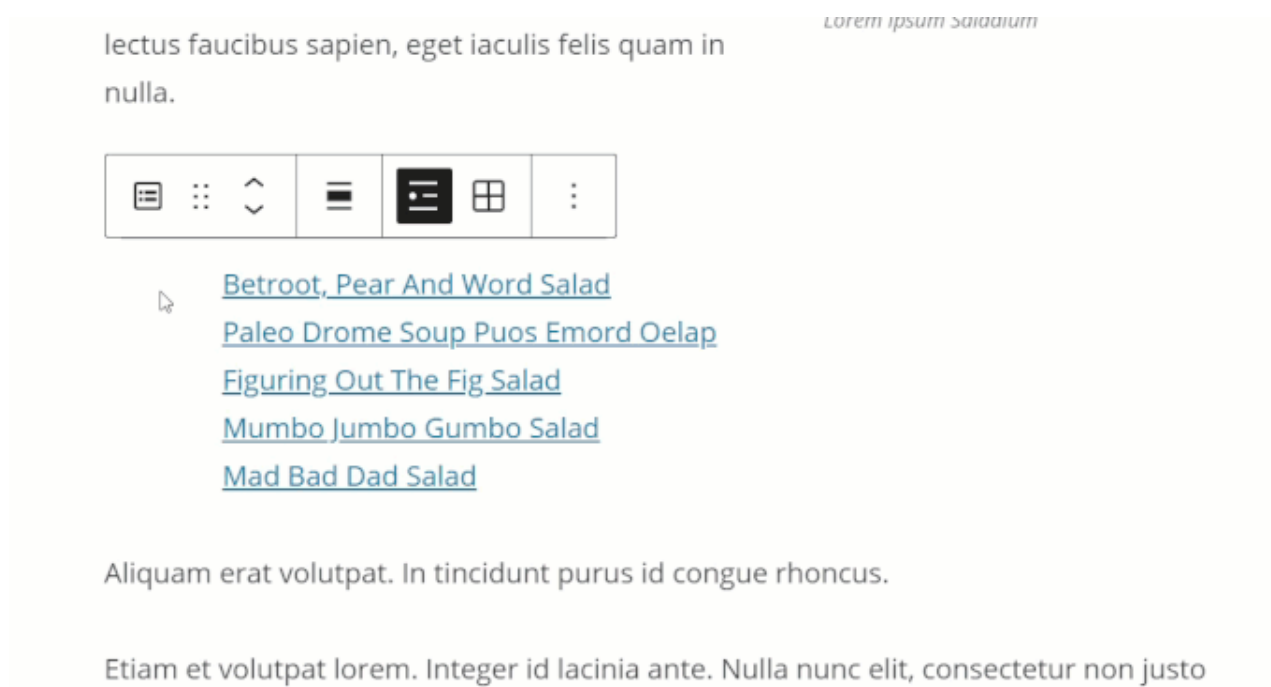

## How To Edit A Latest Posts Block

To edit a Latest Posts block:

- Click inside the Latest Posts block to select it.
- Use the *Block Editor* tools to:
  - Change the alignment of the block.
  - Change the layout of the block (list or grid view).
- Use the *Block Settings* to configure block settings.

Let's go through some of the things you can do with this block:

First, you can change the alignment of the block in your content using the Alignment options.

Change the alignment of your Latest Posts block.

Next, you can configure your Latest Post block's settings to customize its layout and display.

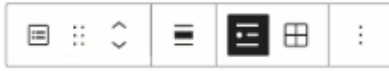

For example, you can:

- Display your latest posts as a List or in a Grid.
- Display the post content as an **excerpt** (and set the maximum number of words to display in the excerpt) or as a full post.
- Display the post author's name.
- Display the post date.
- Display a featured image with each post entry, and adjust image sizes and dimensions.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Cras rutrum, eros vitae suscipit cursus, sem lectus faucibus sapien, eget iaculis felis quam in nulla.

Lorem Ipsum Saladium

[Betroot, Pear And Word Salad](#)  
[Paleo Drome Soup Puos Emord Oelap](#)  
[Figuring Out The Fig Salad](#)  
[Mumbo Jumbo Gumbo Salad](#)  
[Mad Bad Dad Salad](#)

Aliquam erat volutpat. In tincidunt purus id congue rhoncus.

Etiam et volutpat lorem. Integer id lacinia ante. Nulla nunc elit, consectetur non justo eget, ornare varius turpis.

Nulla cursus at est consequat tempus. Proin vel volutpat lacus. Quisque hendrerit varius nibh, id blandit purus venenatis interdum. Etiam et mi in turpis pharetra molestie. Vivamus pretium elementum ante, eu tincidunt orci hendrerit a. Aliquam mattis risus aliquam, rhoncus mauris pharetra, blandit tellus. Fusce convallis arcu sit amet augue venenatis, fringilla lacinia arcu consectetur.

Post Block settings panel:

- Latest Posts**: Display a list of your most recent posts.
- Post content settings**:  Post content
- Post meta settings**:  Display author name,  Display post date
- Featured image settings**:  Display featured image
- Sorting and filtering**:
  - Order by: Newest to oldest
  - Categories: [Empty input field]

Configure your Latest Posts block by changing its content, meta, and featured image settings.

You can also display your latest posts using different sorting and filtering options, such as:

- Order posts chronologically or alphabetically (and reverse-wise).
- Filter posts by categories.
- Filter posts by author.
- Filter posts by number of items.

rutrum, eros vitae suscipit cursus, sem lectus faucibus sapien, eget iaculis felis quam in nulla.

[Betroot, Pear And Word Salad](#)  
[Paleo Drome Soup Puos Emord Oelap](#)  
[Figuring Out The Fig Salad](#)  
[Mumbo Jumbo Gumbo Salad](#)  
[Mad Bad Dad Salad](#)

Aliquam erat volutpat. In tincidunt purus id congue rhoncus.

Etiam et volutpat lorem. Integer id lacinia ante. Nulla nunc elit,

Sorting and filtering settings panel:

- Order by**: Newest to oldest
- Categories**: [Empty input field]  
Separate with commas or the Enter key.
- Author**: All
- Number of items**: 5

Display your latest posts using various sorting and filtering options.

If you choose to have featured images display with your posts, you can specify additional settings, such as:

- Select image size – thumbnail, medium, large.
- Specify image dimensions – enter dimensions for width and height into the value fields, or select preset percentage values.
- Specify image alignment (left, center, right).
- Specify the number of columns (if Grid view is selected).
- Add a link from the featured image to the post.

When combined, the above settings give you a wide range of display options for the Latest Posts block.

For example, here is a sample post with a *grid view* selected, and the featured image settings turned on...

The screenshot displays a WordPress 'Latest Posts' block in grid view. At the top, there is a text excerpt: "rutrum, eros vitae suscipit cursus, sem lectus faucibus sapien, eget iaculis felis quam in nulla." Below the text is a toolbar with icons for list view, grid view (selected), and other options. The main content area shows three posts, each with a featured image and a title link: "Betroot, Pear And Word Salad", "Figuring Out The Fig Salad", and "Mumbo Jumbo Gumbo Salad". To the right of the posts is a settings panel titled "Featured image settings". The settings include: "Display featured image" (checked), "Image size" (Thumbnail), "Image dimensions" (Width: 150, Height: 150), "Image alignment" (Center), and "Add link to featured image" (unchecked).

Sample post with Latest Posts block. Grid view selected and featured image settings turned on.

Here is the same post with additional options like **post author**, post date, and post excerpt turned on, and 3 columns selected in the Sorting and Filtering settings...

The image shows a WordPress editor interface. At the top left, there is a toolbar with icons for list, grid, and other views. The main content area displays a grid of three recipe posts:

- Betroot, Pear And Word Salad** by Antoinette Vinagrette, December 3, 2020. Ingredients: Beetroot water, spinach okra water, chestnut ricebean, pear catsear, courgette summer, purslane. Water, spinach arugula pea.
- Paleo Drome Soup Puos Emord Oelap** by Antoinette Vinagrette, November 15, 2020. Ingredients: Necessitatibus, consectetur, consectetur et ipsam, id molestiae facilis, est autem a, inventore aspernatur, vitae autem dicta.
- Figuring Out The Fig Salad** by Antoinette Vinagrette, November 2, 2020. Ingredients: Pea horseradish, azuki bean lettuce, avocado asparagus, okra. Kohlrabi radish, okra azuki bean corn, fava bean mustard, tigernut green bean.

The right-hand settings panel is open, showing the following options:

- Featured image settings:**  Display featured image
- Image size:** Thumbnail
- Image dimensions:** Width: 150, Height: 150. Presets: 25%, 50%, 75%, 100%.
- Image alignment:**  Align center
- Add link to featured image:**
- Sorting and filtering:** Order by

Sample post with Latest Posts block. Grid view selected and various image settings applied (3 columns).

Here is the same post with the exact same settings as above and a 4-column layout...

### [Betroot, Pear And Word Salad](#)

by Antoinette Vinagrette  
December 3, 2020

Beetroot water  
spinach okra water  
chestnut ricebean  
pear catsear  
courgette summer  
purslane. Water  
spinach arugula

November 1, 2020

Gumbo kakadu  
plum komatsuna  
black-eyed pea  
green bean  
zucchini gourd  
winter purslane  
silver beet rock

Sample post with Latest Posts block. Grid view selected and various image settings applied (4 columns).

Here is the same post with the *list* view selected and a left-aligned featured thumbnail image...

The screenshot shows a WordPress post editor interface. At the top, there is a toolbar with icons for list view, grid view, and other options. The main content area displays a featured image of a salad, followed by the title "Betroot, Pear And Word Salad" by Antoinette Vinagrette, dated December 3, 2020. Below the title is a list of ingredients: Beetroot, water, spinach, okra, water, chestnut, ricebean, pear, catsear, courgette, summer purslane, Water, spinach, arugula, pea, tatsoi, aubergine, spring onion, bush tomato, kale, radicchio, turnip, chicory, salsify, pea sprouts, fava bean, Dandelion, zucchini, burdock, yarrow, chickpea, dandelion, sorrel, courgette, turnip, greens, tigernut, soybean, radish, artichoke, wattle seed, endive, groundnut, broccoli, arugula. On the right side, the "Featured image settings" panel is open, showing a toggle for "Display featured image" which is turned on. The "Image size" is set to "Thumbnail". The "Image dimensions" are set to 150x150 pixels. The "Image alignment" is set to "Left".

Sample post with Latest Posts block. List view selected, left-aligned featured image, and various other image settings applied.

And here is the same post with *list view* selected and most block settings turned off...

The screenshot shows a WordPress post editor interface. The main content area displays a featured image of a salad, followed by the title "Betroot, Pear And Word Salad" by Antoinette Vinagrette, dated December 3, 2020. Below the title is a list of ingredients: Beetroot, water, spinach, okra, water, chestnut, ricebean, pear, catsear, courgette, summer purslane, Water, spinach, arugula, pea, tatsoi, aubergine, spring onion, bush tomato, kale, radicchio, turnip, chicory, salsify, pea sprouts, fava bean, Dandelion, zucchini, burdock, yarrow, chickpea, dandelion, sorrel, courgette, turnip, greens, tigernut, soybean, radish, artichoke, wattle seed, endive, groundnut, broccoli, arugula. The "Image dimensions" are set to 150x150 pixels. The "Image alignment" is set to "Left".

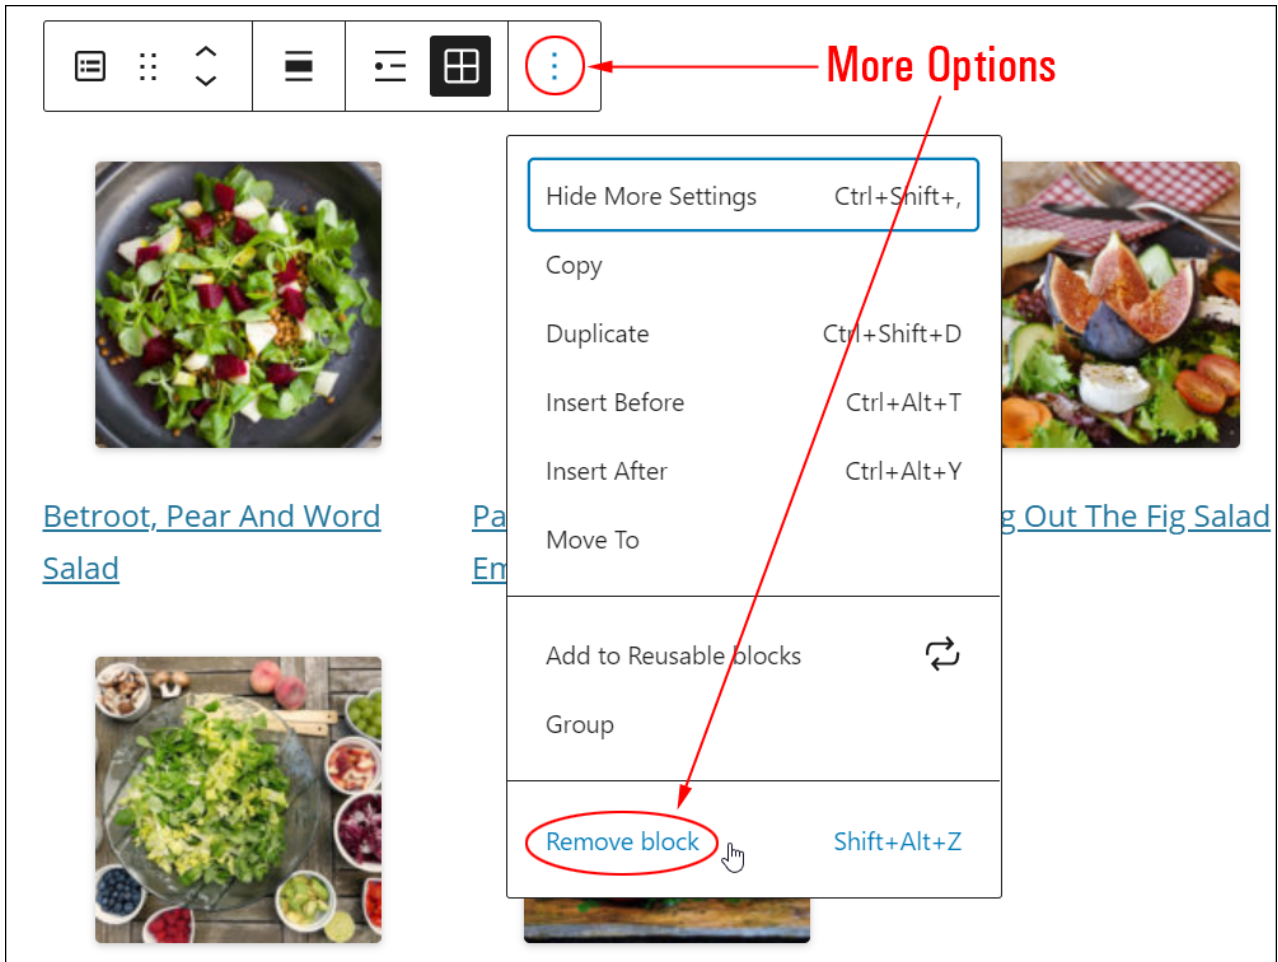

Latest Posts block with List view and default settings.

Remember to update and publish your post or page to save your settings.

## How To Remove A Latest Posts Block

To delete or remove a Latest Posts block from your content:

- Click inside the Latest Posts block to select it.
- Select the 'More Options' tool in the Block Editor.
- Click on 'Remove block'.
- This will remove the Latest Posts block from your content or **widget**.

Use the More Options menu to remove the Latest Posts block from your content.

*Additionally...*

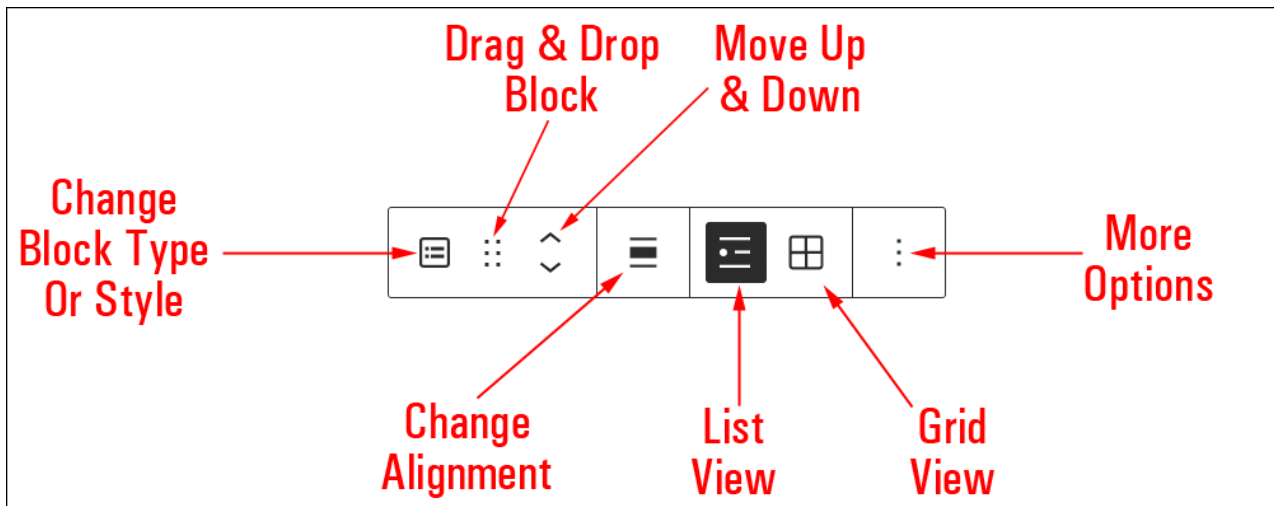

- You can reposition your block using the 'Move Up' and 'Move Down' arrows or the Drag and Drop handle tool (if you need help with this step, see our tutorial on [How To Use Blocks](#)).
- You can also convert the Latest Posts block into a **Reusable block**.

## Latest Posts Block Tools, Options & Settings

The *Latest Posts block* includes tools, options, and settings for:

- Latest Posts Block Editor
- Latest Posts Block Settings

### Latest Posts Block Editor

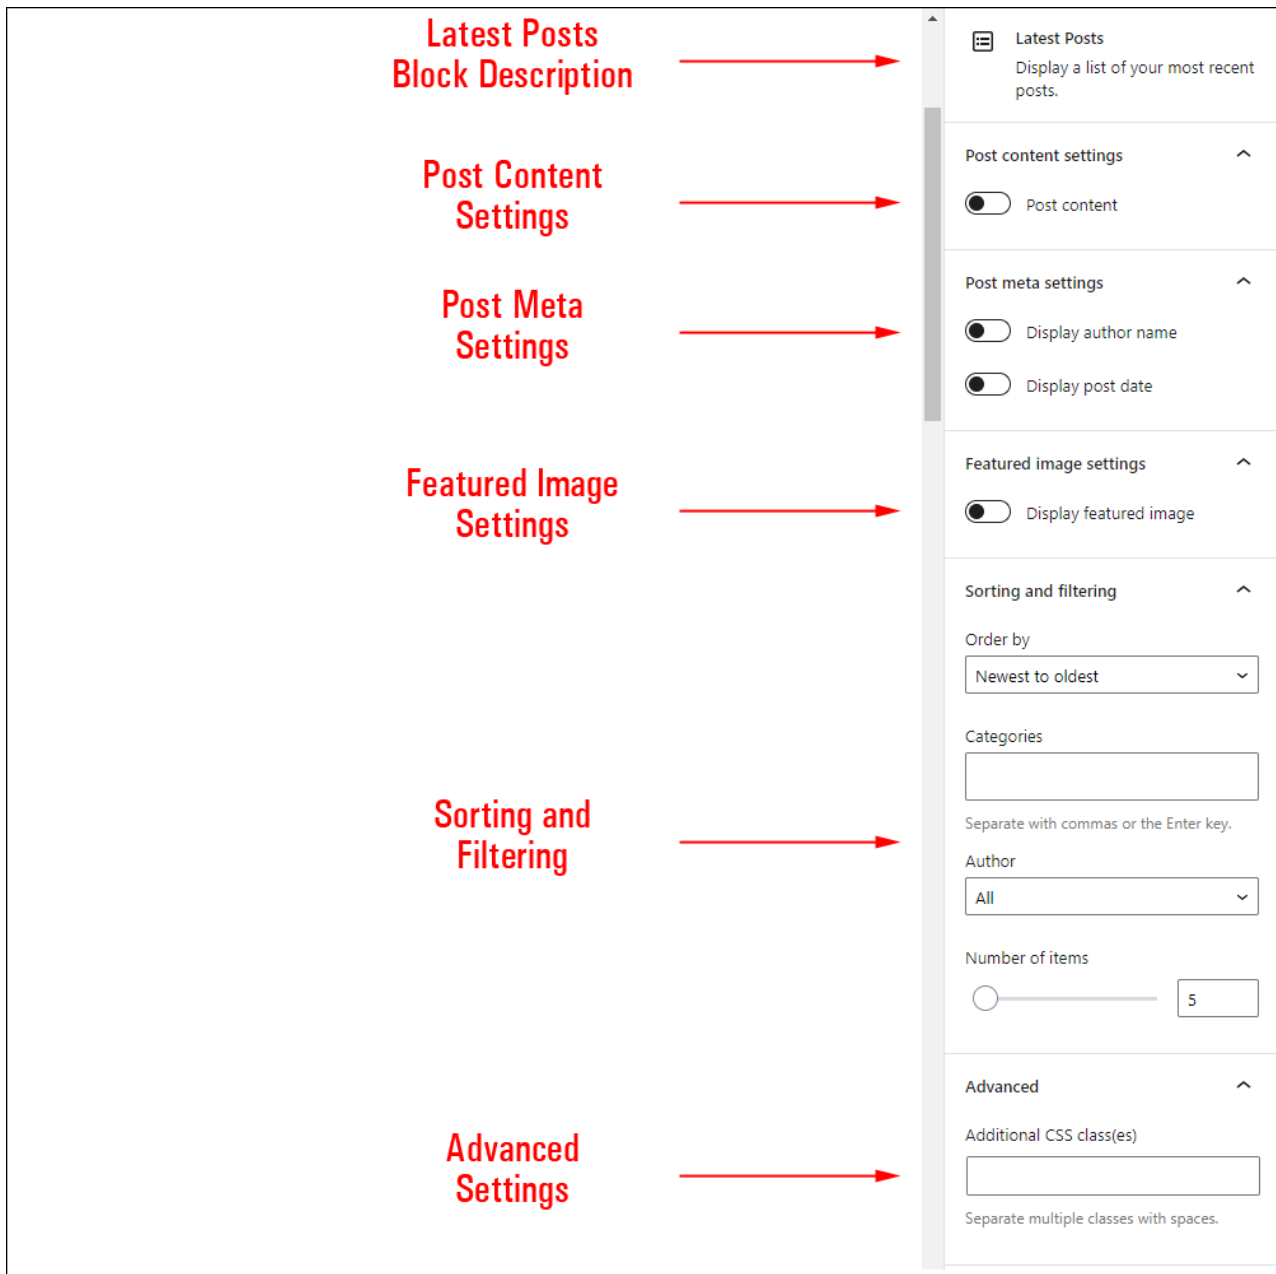

Latest Posts block editor.

The *Latest Posts Block Editor* includes tools that let you perform the following operations:

- **Display Block Type** (See '*Latest Posts Block – Additional Info*' section below.)
- **Drag & Drop Tool**
- **Move Up and Down Tool**
- **Change Alignment**
  - Align left
  - Align center
  - Align right
  - Wide width – makes the block stick out on either side of regular content.
  - Full width – makes the block stretch over the entire width of the browser window (regular content remains within margins on either side).
- **Display**
  - List view
  - Grid view
- **More Options** – See [How To Use Blocks](#) to learn how to use this section.

## Latest Posts Block Settings

---

Latest Posts block settings.

Latest Posts Block settings include:

- **Block description area**
- **Posts content settings**
  - *Post content* – display content in addition to the post title:
    - Show Excerpt
      - *Max number of words in excerpt* – use the slider or enter a value (maximum 100 words)
    - Show Full Post
- **Posts meta settings**
  - Display author name (*on/off*)
  - Display post date (*on/off*)

- **Featured image settings**

Display featured image (*on/off*). If 'on':

- *Image size*
  - Thumbnail
  - Medium
  - Large
- *Image dimensions*
  - Width / height – enter values in the fields.
  - Presets – Select a preset value: 25%, 50%, 75%, 100%.  
Reset – Click to restore the featured image to its original size.
- Image alignment – This aligns the featured image within the list or grid view:
  - Left align
  - Center align
  - Right align

- **Sorting and Filtering**

- *Order By*
  - Newest To Oldest
  - Oldest To Newest
  - A -> Z
  - Z -> A
- *Categories* – Displays only posts assigned to specific **categories**.
- *Author* – Displays only posts assigned to a specific **author**.
- *Number of items* – Specify the number of posts to display in the block (minimum = 1, maximum = 100 posts)
  - Slide to increase or decrease the number.
  - Type in the number.
  - Click the up or down buttons inside the number field to increase or decrease the number.
- *Number of Columns* – If Grid view is selected, you can specify the number of columns to display in the grid (1-6).

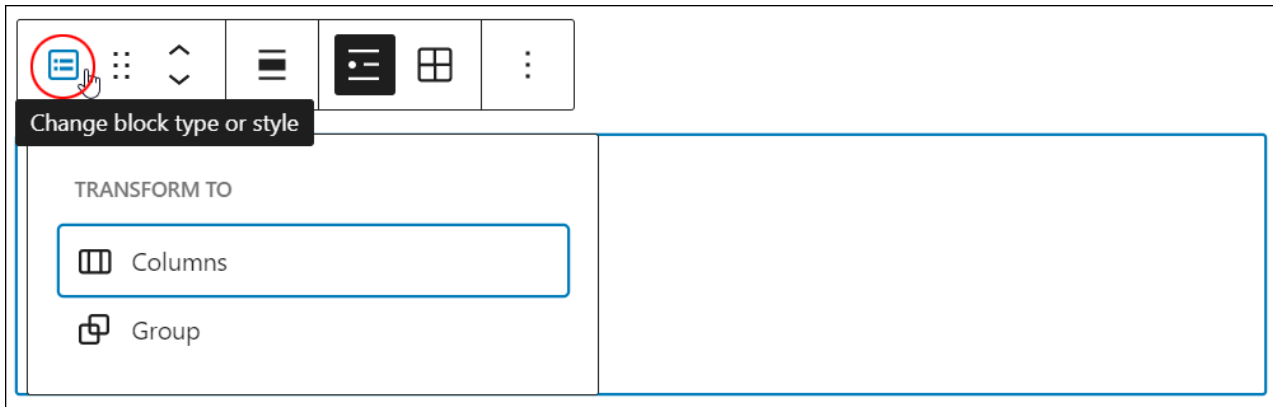

- **Advanced Settings**

*Additional CSS Class(es)* – This field lets you add multiple CSS classes to your block separated with spaces. This allows you to write custom CSS and style the block as you see fit. Note: This requires having knowledge of CSS (Cascading Style Sheets).

## Latest Posts Block – Additional Info

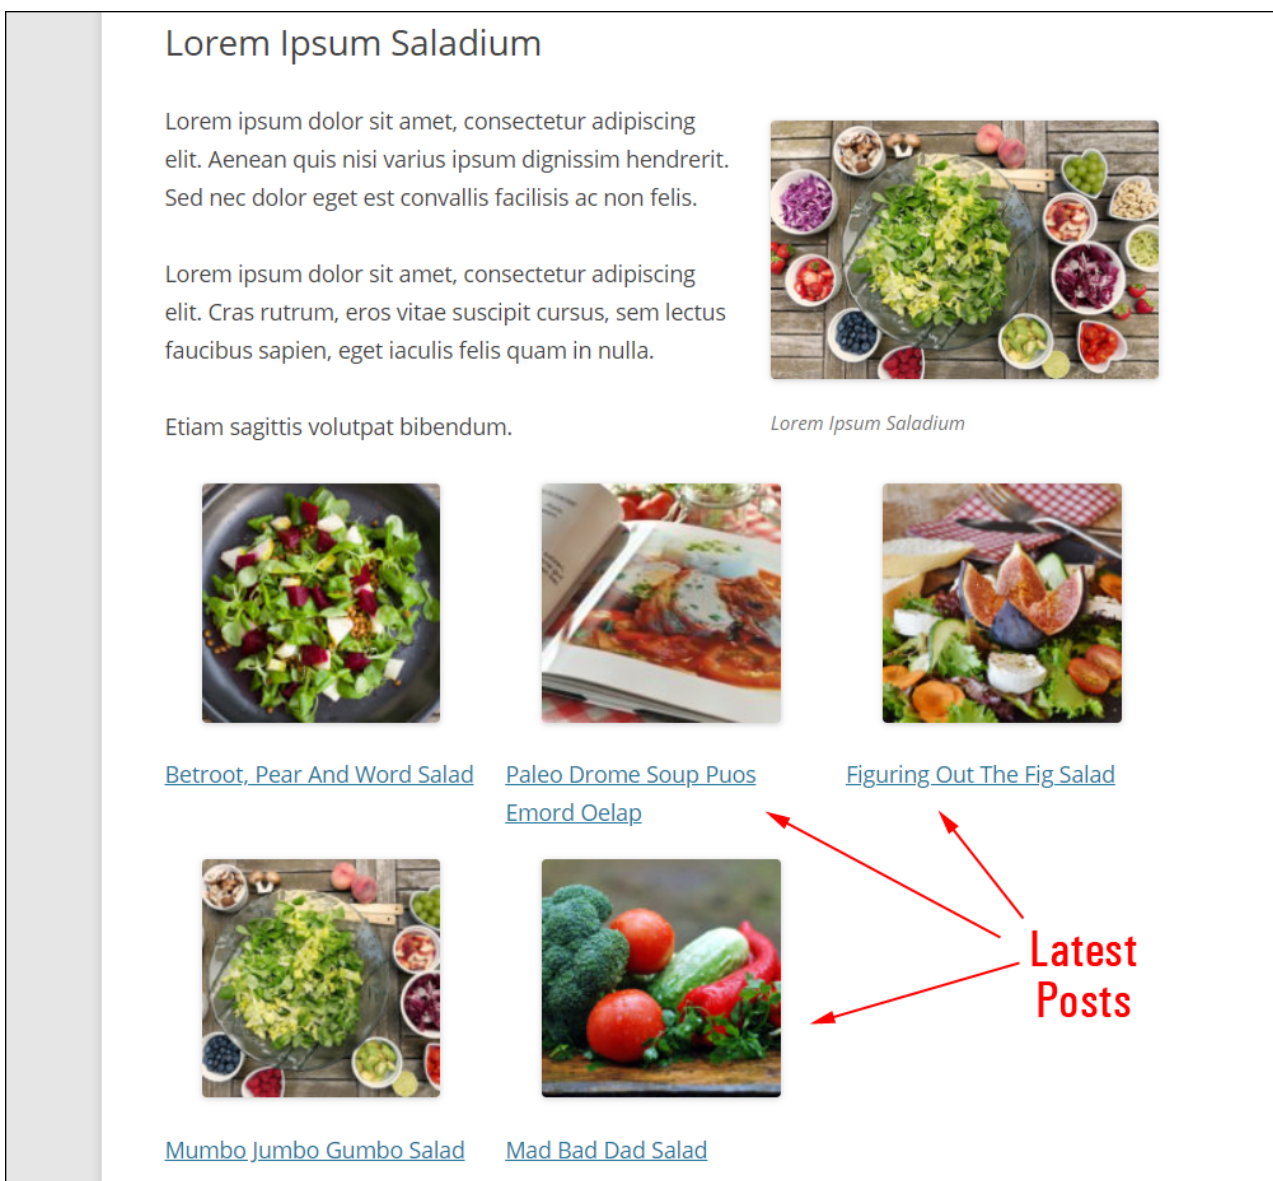

---

You can convert a *Latest Posts block* into the following block types:

Change the Latest Posts block into other block types.

Installing **plugins** or **themes** on your site may also add new functionality, options, or settings to the Latest Posts block.

Display your latest posts anywhere on your site using the Latest Posts block.

Congratulations! Now you know how to use the WordPress content editor's **Latest Posts block**.
