How To Add An Image Gallery In WordPress

WordPress Training

In this tutorial, you will learn how to insert multiple images into your posts and pages using the WordPress image gallery feature.

This tutorial covers:

This tutorial explains how to add an image gallery to your posts and pages using the **WordPress Classic Editor**.

For a step-by-step tutorial on adding an image gallery to your content using the **WordPress Block Editor**, go here: **WordPress Block Editor – Gallery Block**

If you need help inserting single images into your content, see this tutorial: **How To Add And Format Images In WordPress**

If you are looking for a simple way to insert multiple images into your posts or pages or add a photo gallery to your site, you don't need a plugin.

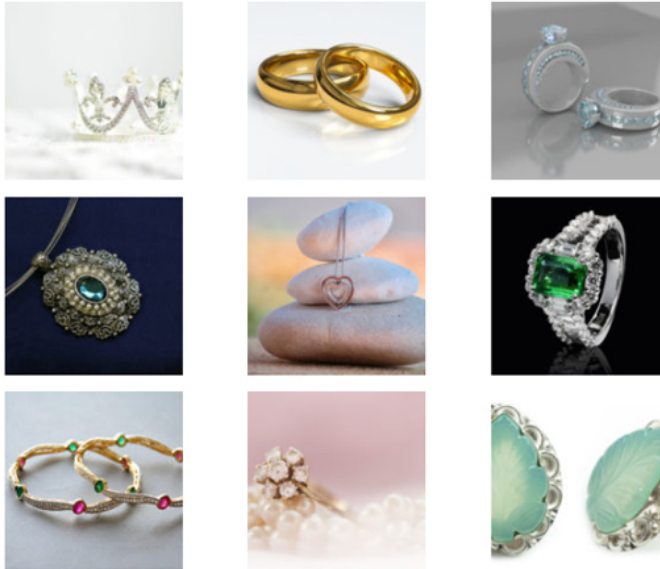

WordPress has a built-in image gallery feature that lets you easily insert multiple images into your content and display these in a professional-looking grid-like gallery view.

Here is an example of an image gallery created using the WordPress gallery feature.

The World's Most Desirable Jewelry Collection

WordPress image gallery.

The WordPress built-in image gallery feature lets you create multiple image galleries for displaying images on your posts and pages.

Why Use An Image Gallery

By default, WordPress displays multiple images stacked above each other in your content.

If you plan to add many images to your posts or pages, this won't look great (or feel great) to users, as they will have to do quite a bit of scrolling down the page to view all your images.

Asking users to scroll endlessly down the page to view multiple images in a post is not a good look.

The WordPress image gallery displays thumbnail images in a grid layout, creating a better user experience.

How To Add Multiple Images To Posts And Pages Using The WordPress Image Gallery

To add an image gallery to a post or page in WordPress:

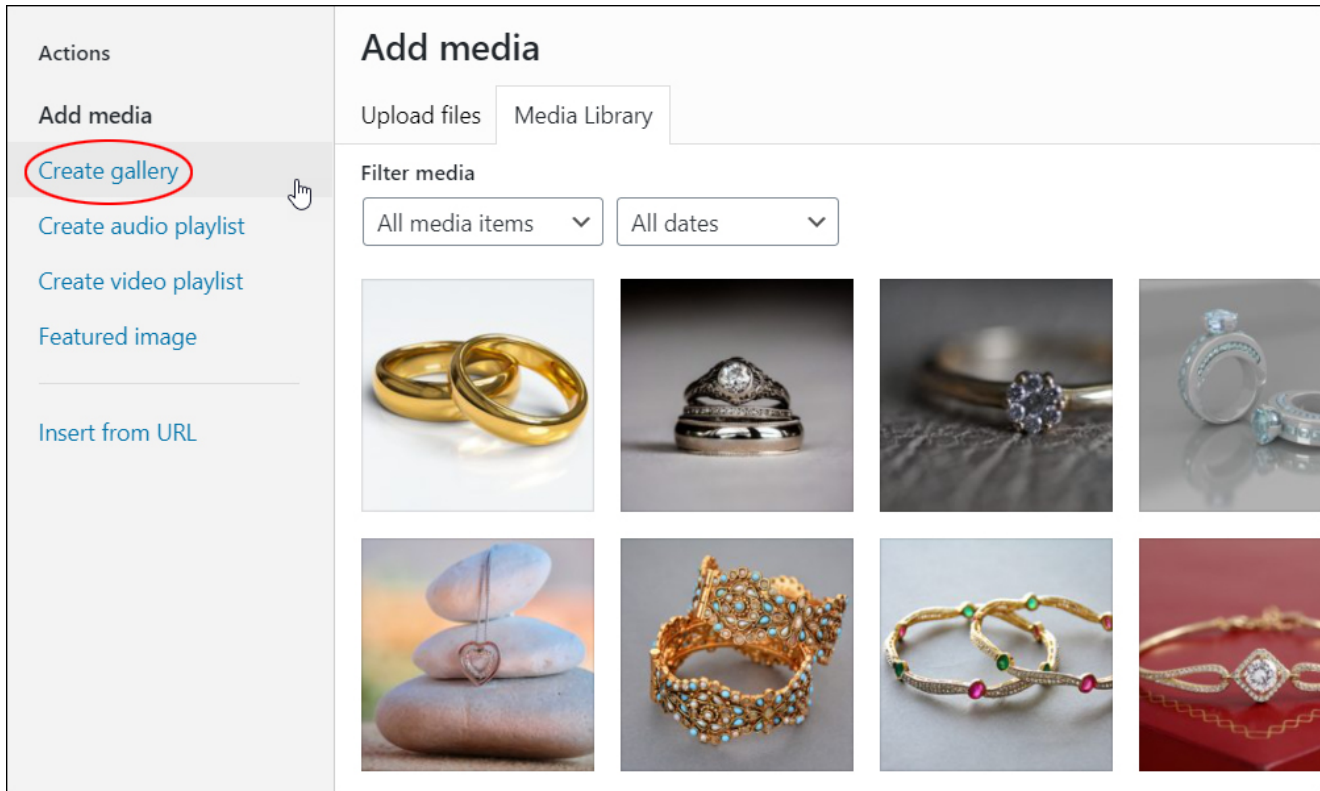

1. Create a new post or page or open an existing one,
2. Place your cursor where you want the image gallery inserted, and
3. Click on the **Add Media** button.

Place your cursor where you would like to insert your media gallery.

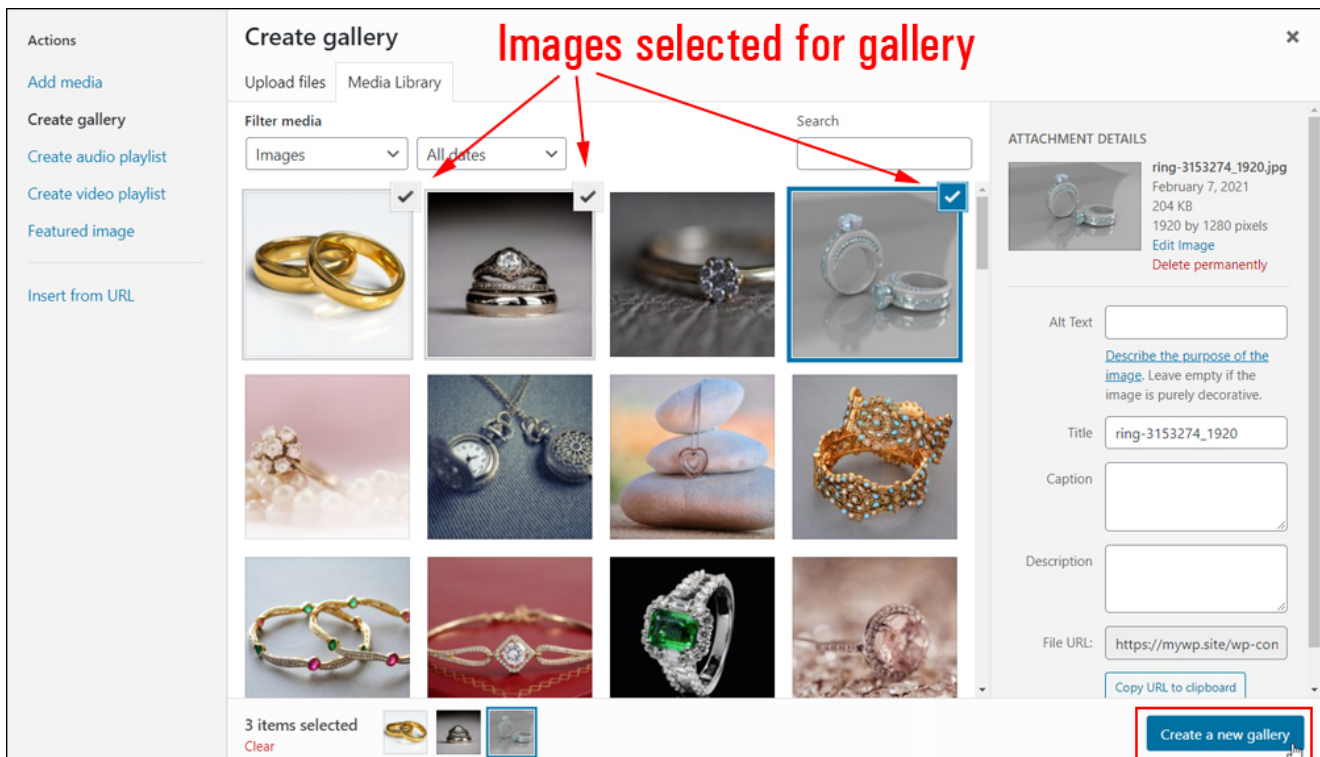

The **Insert Media** screen will open in a pop-up window.

Click on the **Create Gallery** link as shown in the example below.

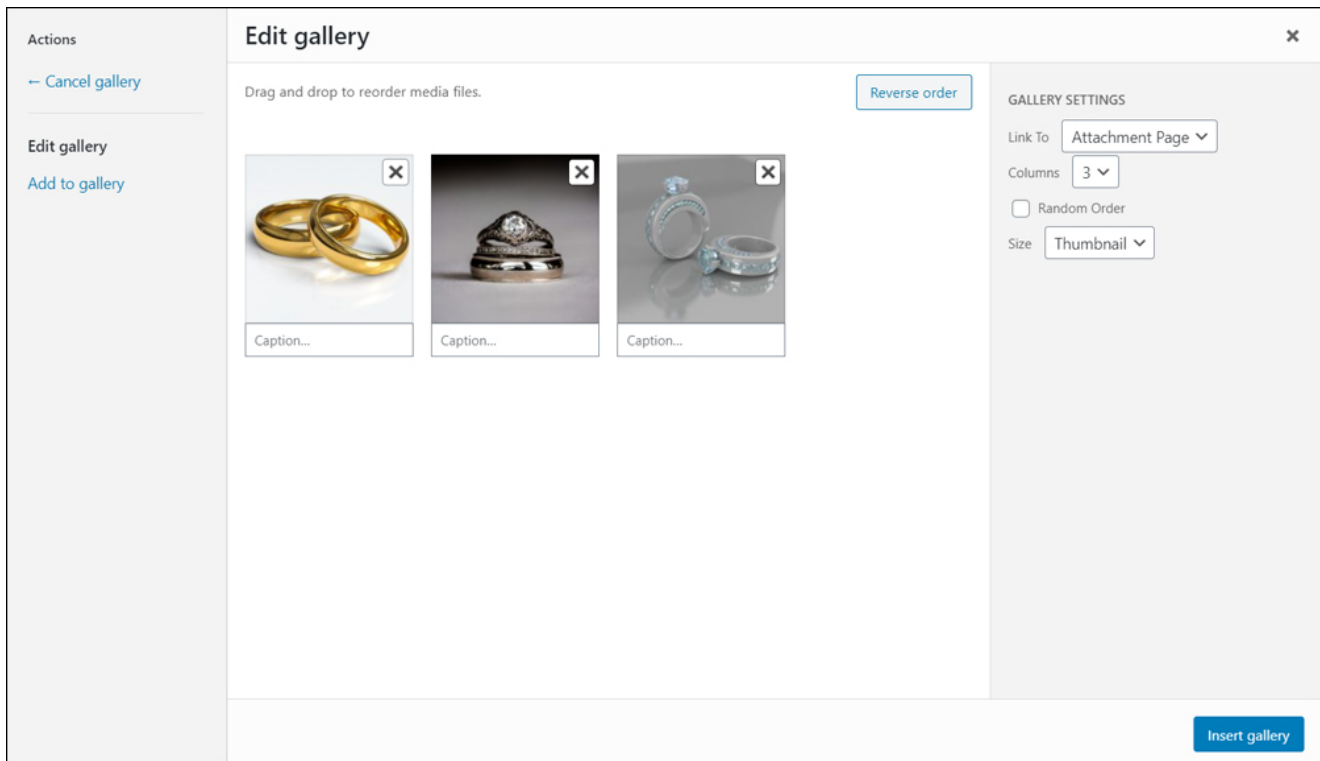

Click on Create gallery.

Select the images you want to include in your gallery (selected images will display a checkmark on the upper right-hand corner) and click on the button labeled **Create a new gallery** at the bottom of the screen.

Select the images you want to add to your gallery.

This will bring up the **Edit Gallery** screen.

The Edit gallery screen.

There are several things you can do on the **Edit Gallery** screen.

You can:

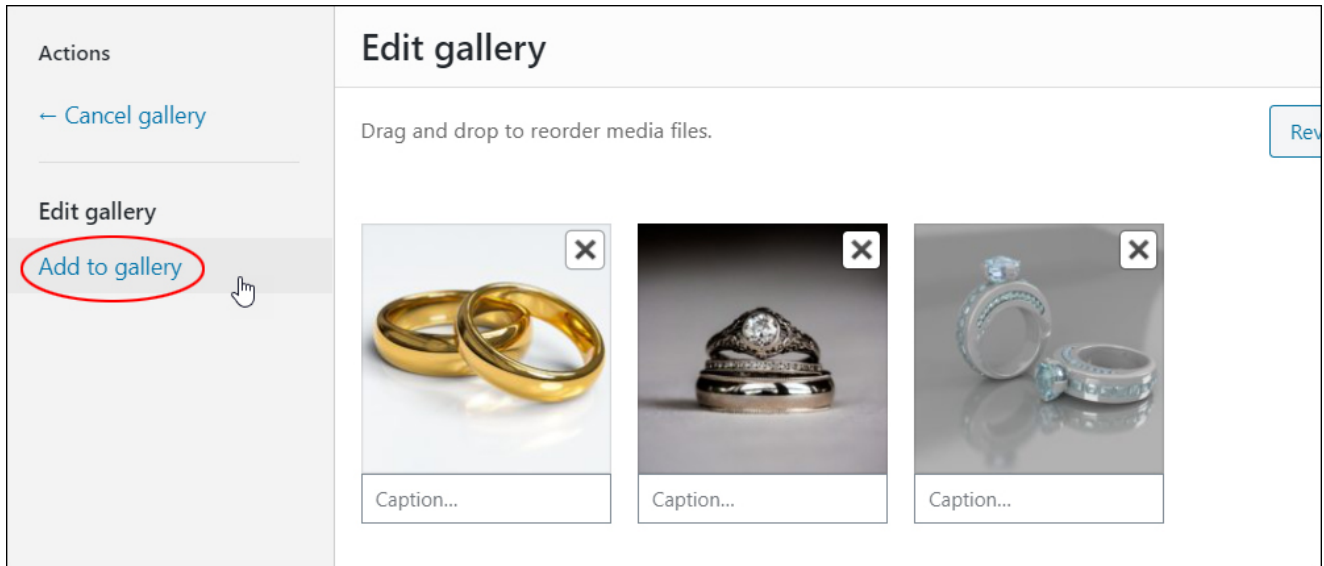

- Add images to your gallery
- Add captions to images
- Reorder images
- Reverse image order
- Remove images

Let's go through each of the above.

Add Images To Your Gallery

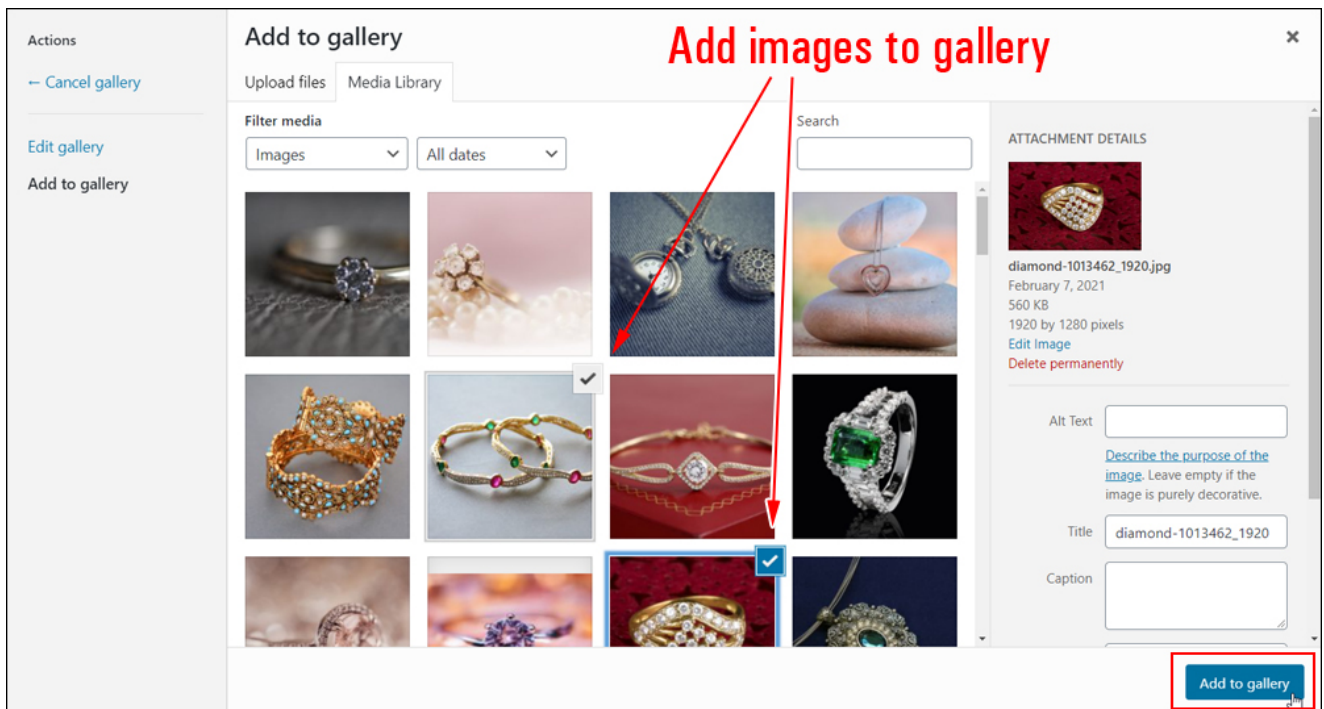

You can add images to your gallery that you have previously uploaded or **upload new images to your Media Library**.

To add new images to your gallery, click on the 'Add to gallery' link.

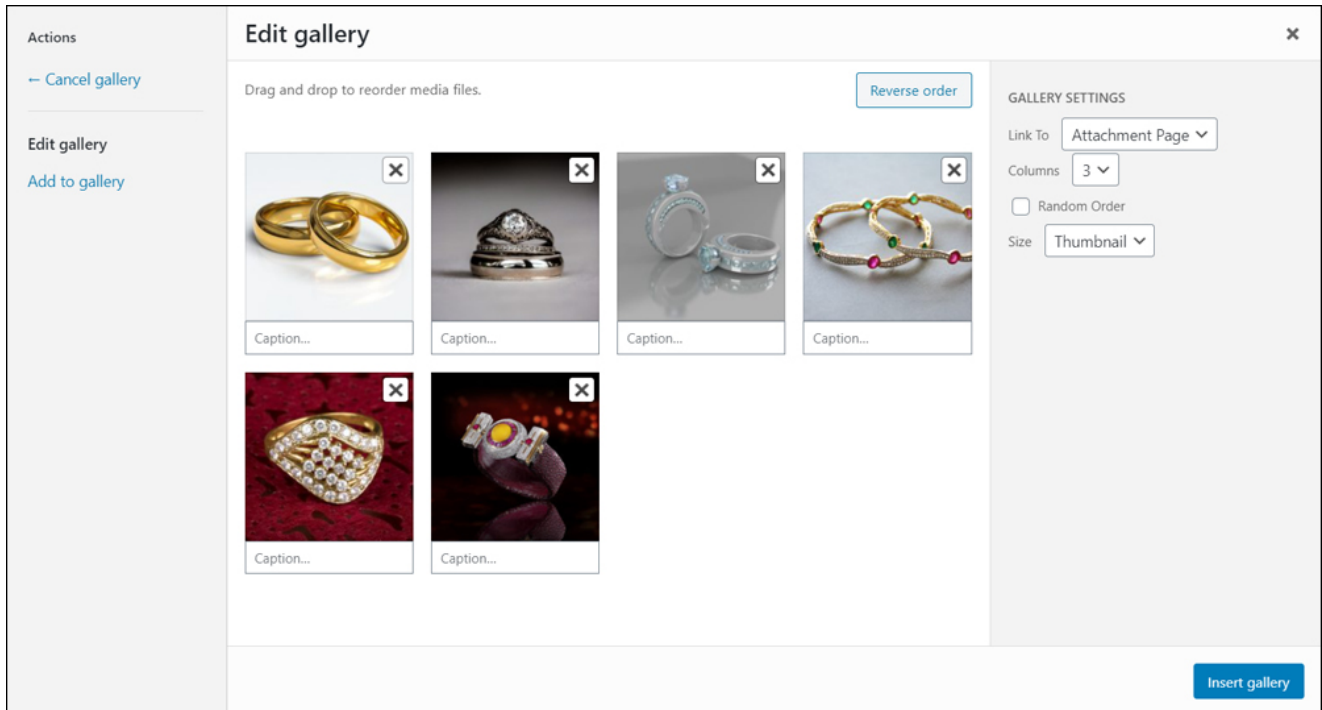

Click on the Add to gallery link to add new images to your gallery.

Next, select the images you would like to add to your gallery. Click the 'Add to gallery' button when done.

Add images to your gallery.

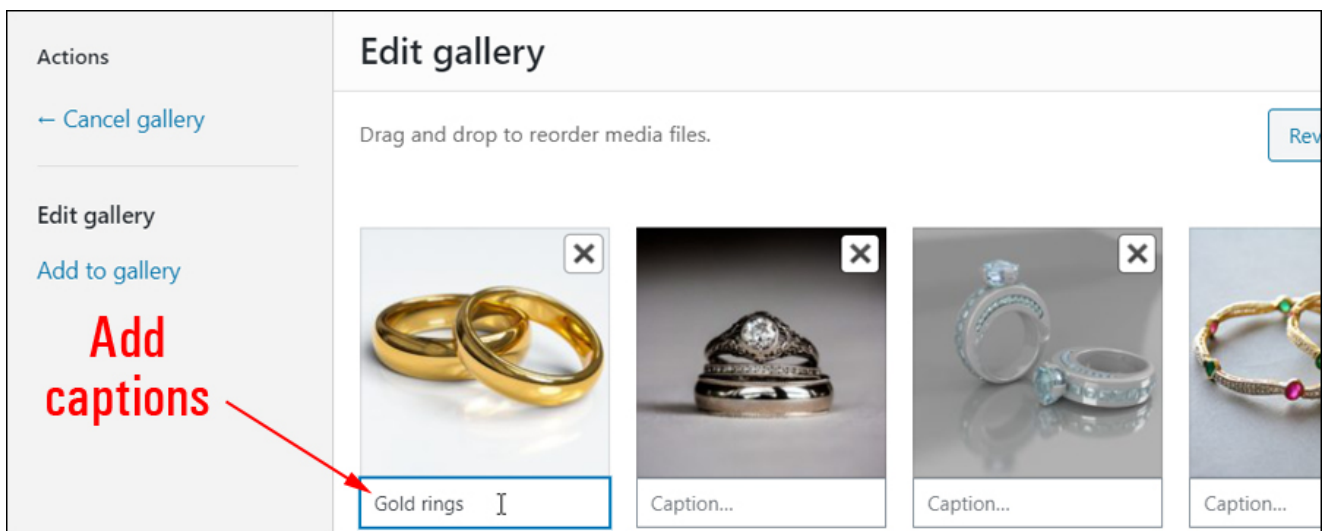

The selected images will be added to your gallery.

The selected images are added to your gallery.

Add A Caption To Images

To add a caption to images in your gallery, click on the field below the image where it says “Caption this image ...” and type in your text.

Add captions to your gallery images.

Reorder Images

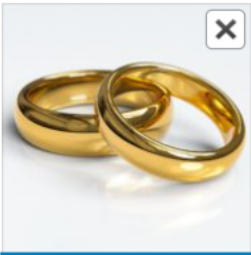

You can **reorder images** using drag and drop.

Edit gallery

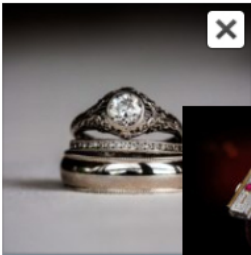

Drag and drop to reorder media files.

Reorder images

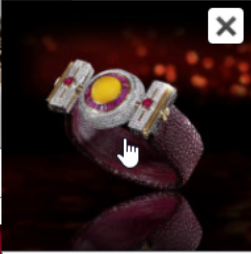

[Reverse order](#)

Reverse the display order of your gallery images.

Reordering and reversing the order of your images gives you complete control over the appearance of images in your gallery.

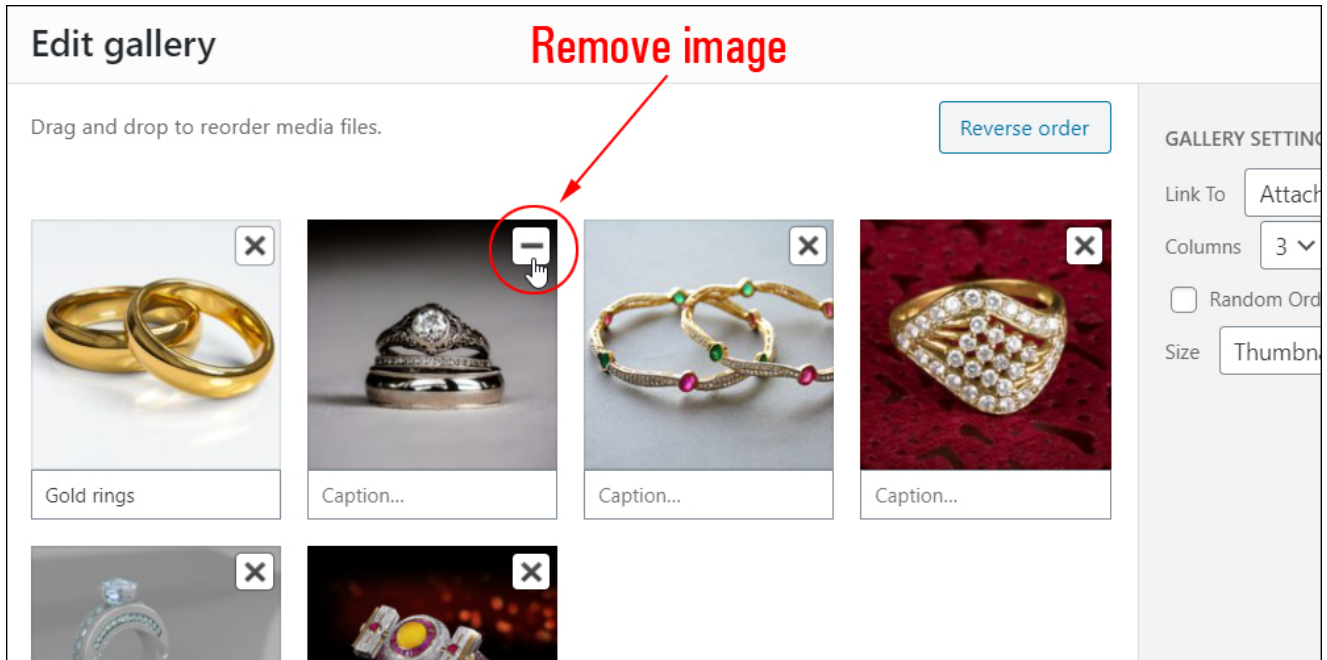

The screenshot shows the 'Edit gallery' interface. At the top, it says 'Edit gallery' and 'Drag and drop to reorder media files.' There is a 'Reverse order' button in the top right corner of the gallery area. The gallery contains 12 images of jewelry, each with a caption and a small 'X' icon in the top right corner. The captions are: 'The World's Rarest Bangle', 'Together...forever!', 'Exquisite Design', 'My Precious', 'Two Identical Unique Rings', 'The Jingle Jangle Bangle', 'Heart of Stone', 'Diamonds To Spare', 'The Barnacle', 'Show stopper', 'Green with Envy', and 'The DNA Collection'. On the right side, there is a 'GALLERY SETTINGS' panel with the following options: 'Link To' set to 'Media File', 'Columns' set to '4', 'Random Order' checkbox unchecked, and 'Size' set to 'Full Size'.

Reverse the order of your images.

Remove Images

You can also remove images from your gallery.

Hover over the “X” until it becomes a “minus” sign, then click to remove the image.

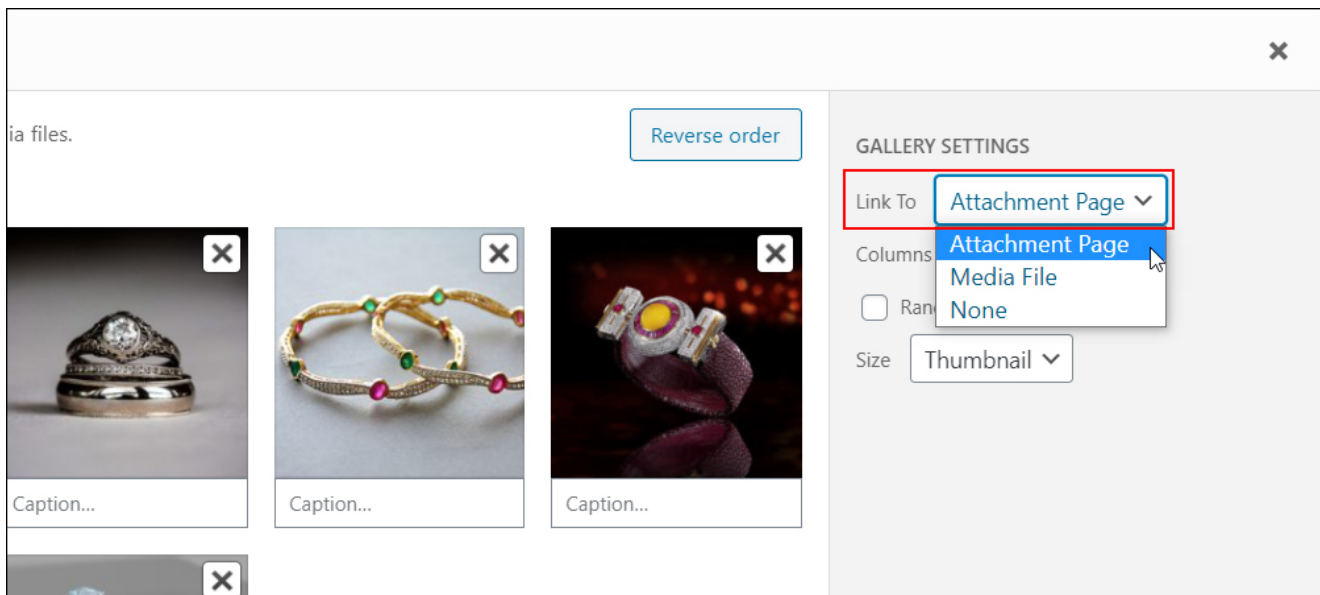

Click on the minus sign to remove the image from your gallery.

Image Gallery Settings

As well as the gallery edit options shown above, there are a few gallery settings that you can adjust.

For example, you can choose whether to link your images to an attachment page, its media file, or add no link (None) by selecting an option from the drop-down menu in the **Link To** section.

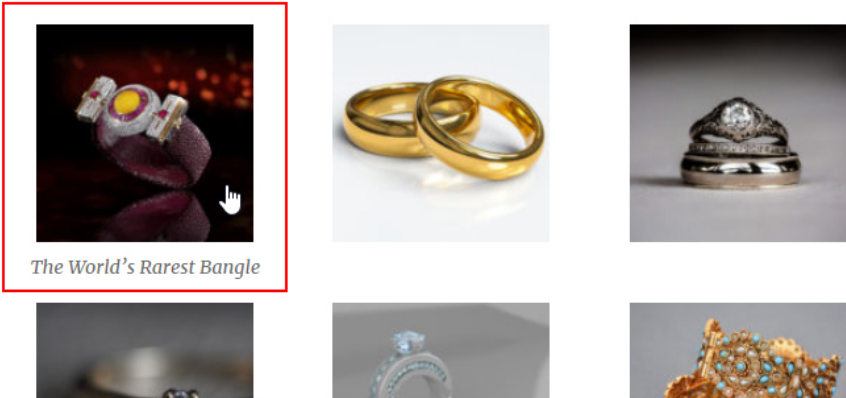

Link To options.

The images below show the difference between selecting the 'Attachment Page' and 'Media File' options.

Note: Selecting 'None' means that no images are linked, so nothing will happen if you hover over the image.

So, clicking on a gallery image...

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vestibulum viverra porta nunc a pulvinar. Nunc ultricies ex eget tristique pulvinar. Aliquam quis iaculis mi. Donec vehicula augue lorem, vel aliquam libero lacinia ultrices.

Publish or update your post or page to save and view your image gallery settings.

Editing Your Image Gallery

To make changes to an existing image gallery, make sure that you are in the “Edit Post” or “Edit Page” screen, and click on your image gallery.

This will display the **Edit Gallery** and **Delete Gallery** icons.

Click on the **Delete Gallery** icon to remove your image gallery from your content or click on the **Edit Gallery** icon to edit your image gallery settings.

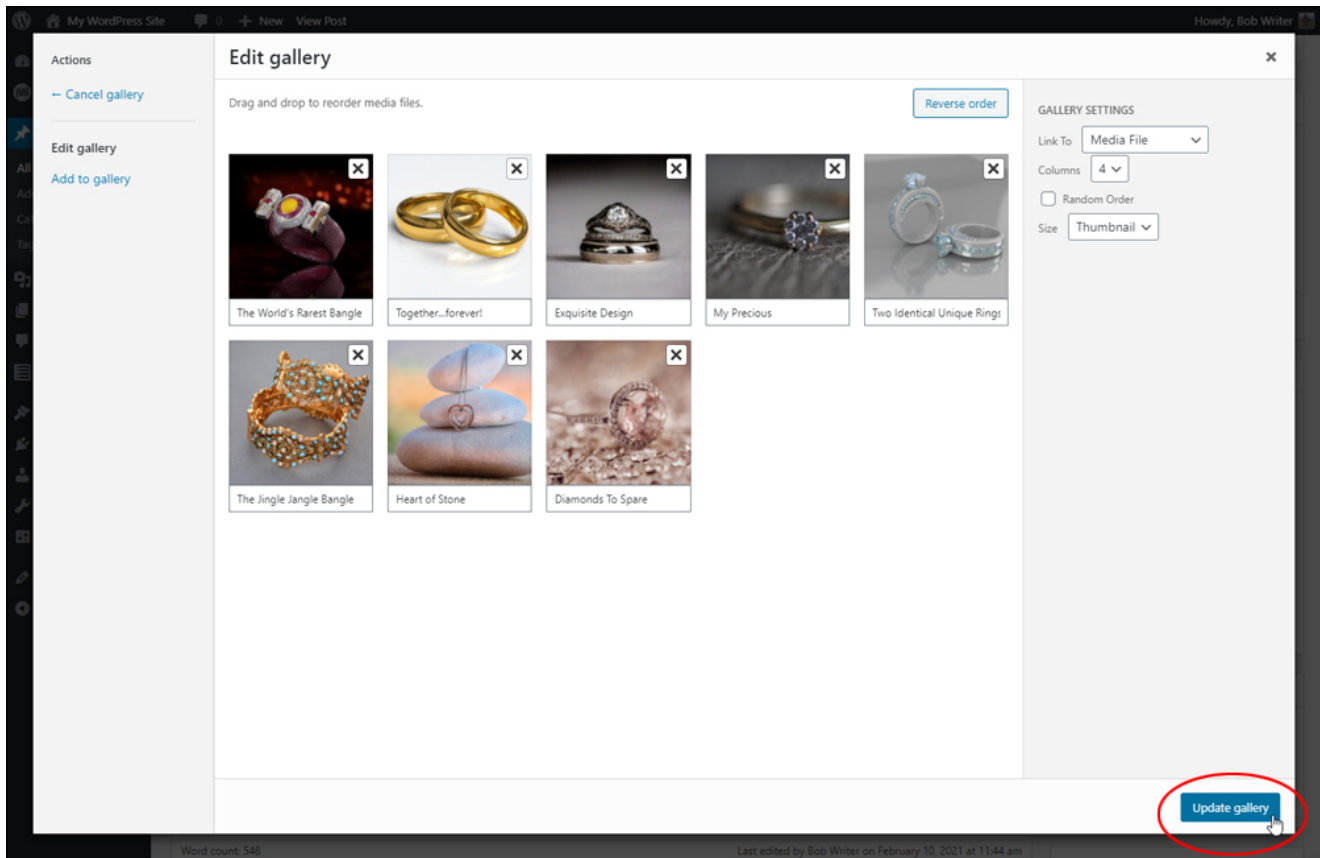

Click on the image gallery to edit its settings or remove it from your post or page.

After clicking on the Edit Gallery icon, you will be presented with the choices we covered earlier:

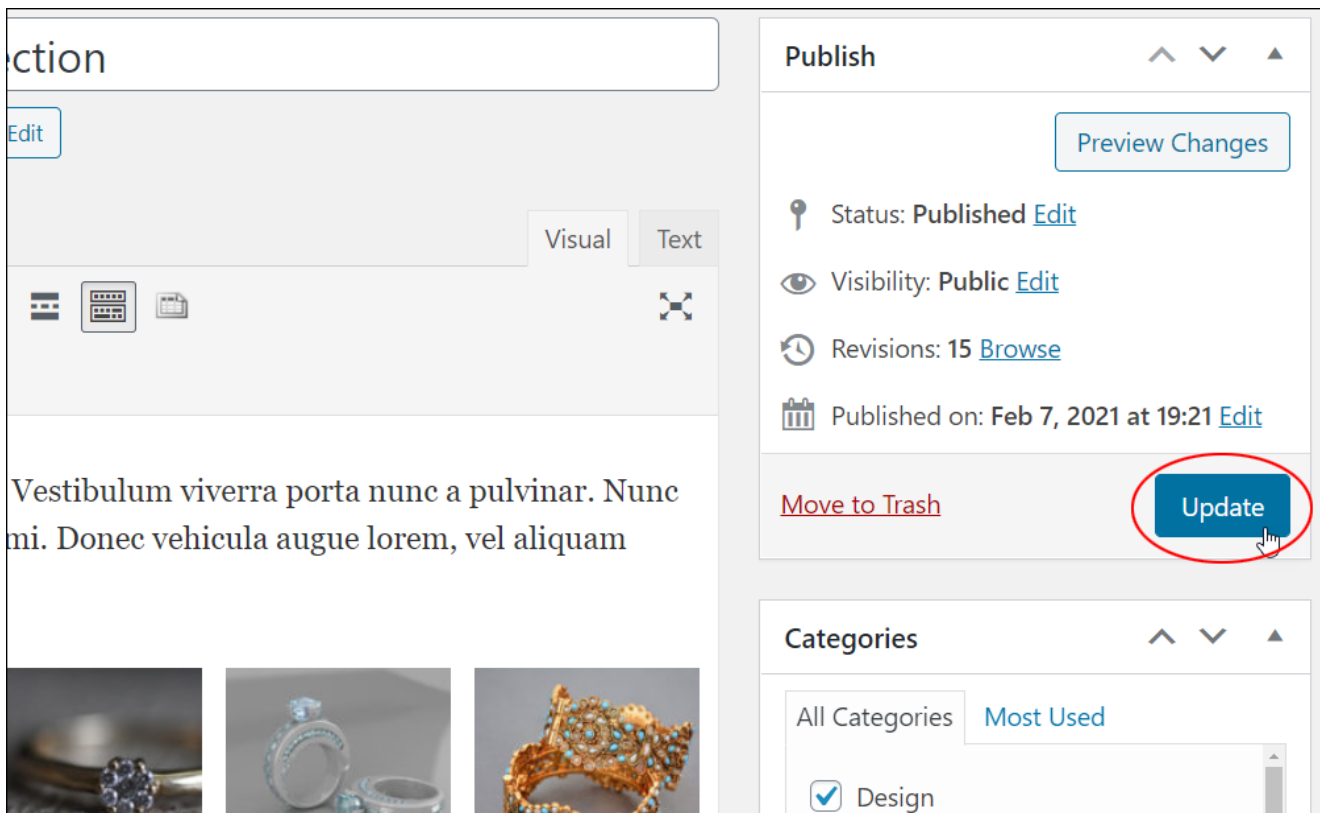

- Add images to your gallery
- Add captions to images
- Reorder images
- Reverse image order
- Remove images

Make your changes and click the ‘Update gallery’ button at the bottom of the Edit gallery screen to update your image gallery.

Click the Update gallery button after editing your image gallery.

Remember to click on the **Update** button to republish your post.

Update your post or page to save your new gallery settings.

Your image gallery will update with the new settings.

WordPress Image Gallery Shortcodes

WordPress supports using various **shortcodes** for images and galleries. A *shortcode* is a single line of code that lets you insert features, functionalities, or scripts into your content that would normally require lots of complex code to pull off.

Shortcodes are typically wrapped in square brackets ([]) as shown below...

[shortcode]

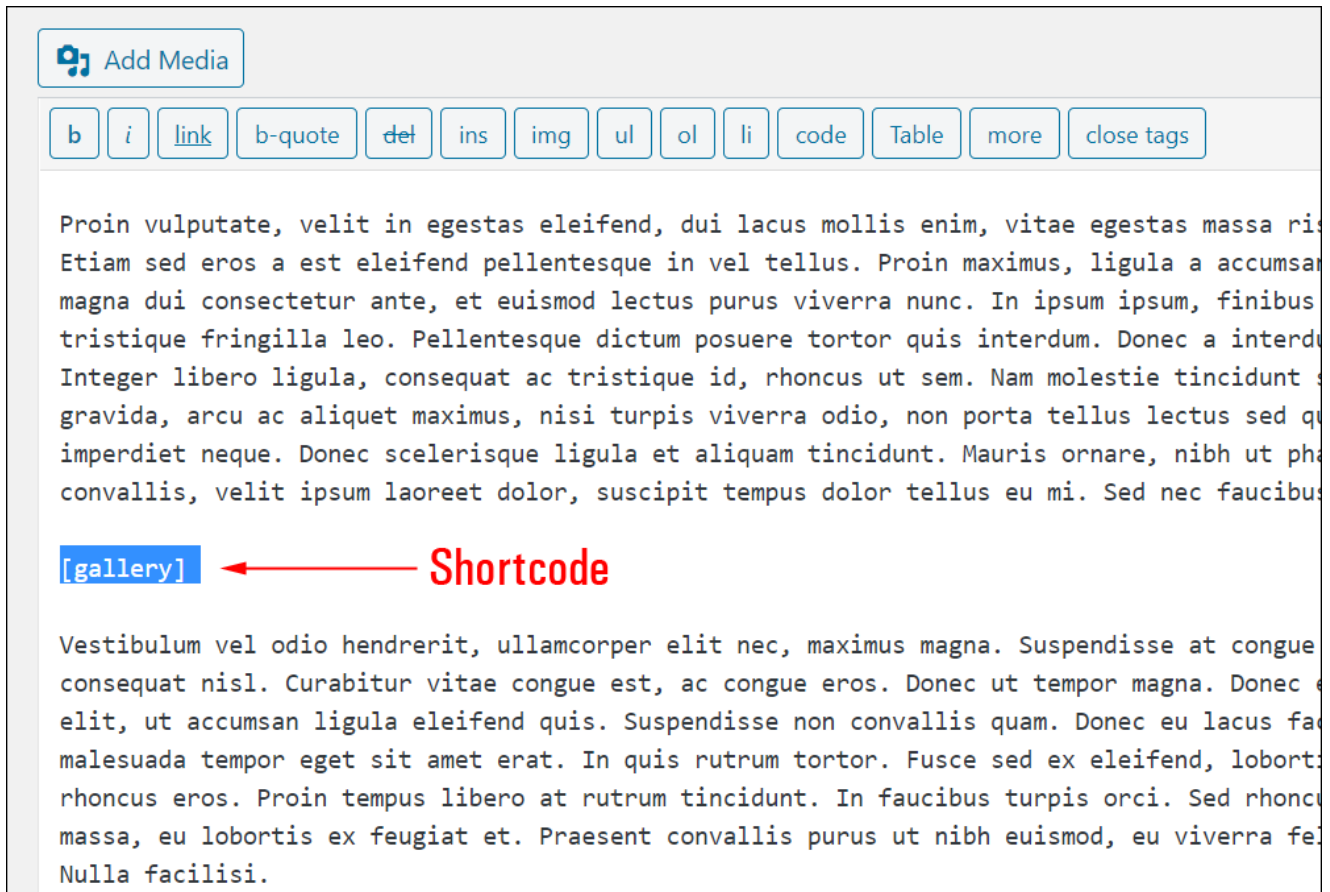

This is what a shortcode looks like.

Here's the shortcode for the WordPress image gallery.

[gallery]

WordPress gallery shortcode.

The screenshot below shows the gallery shortcode inserted into your content via the text editor...

An image gallery shortcode inserted into text via the text editor.

When you publish your post or page, the shortcode calls up the image gallery and displays it on your users' screens.

libero ligula, consequat ac tristique id, rhoncus ut sem. Nam molestie tincidunt suscipit. Cras gravida, arcu ac aliquet maximus, nisi turpis viverra odio, non porta tellus lectus sed quam. Sed varius imperdiet neque. Donec scelerisque ligula et aliquam tincidunt. Mauris ornare, nibh ut pharetra convallis, velit ipsum laoreet dolor, suscipit tempus dolor tellus eu mi. Sed nec faucibus enim.

The World's Rarest Bangle

Gallery Shortcodes

Here are some examples of gallery shortcodes you can use to customize how image galleries display on your posts and pages:

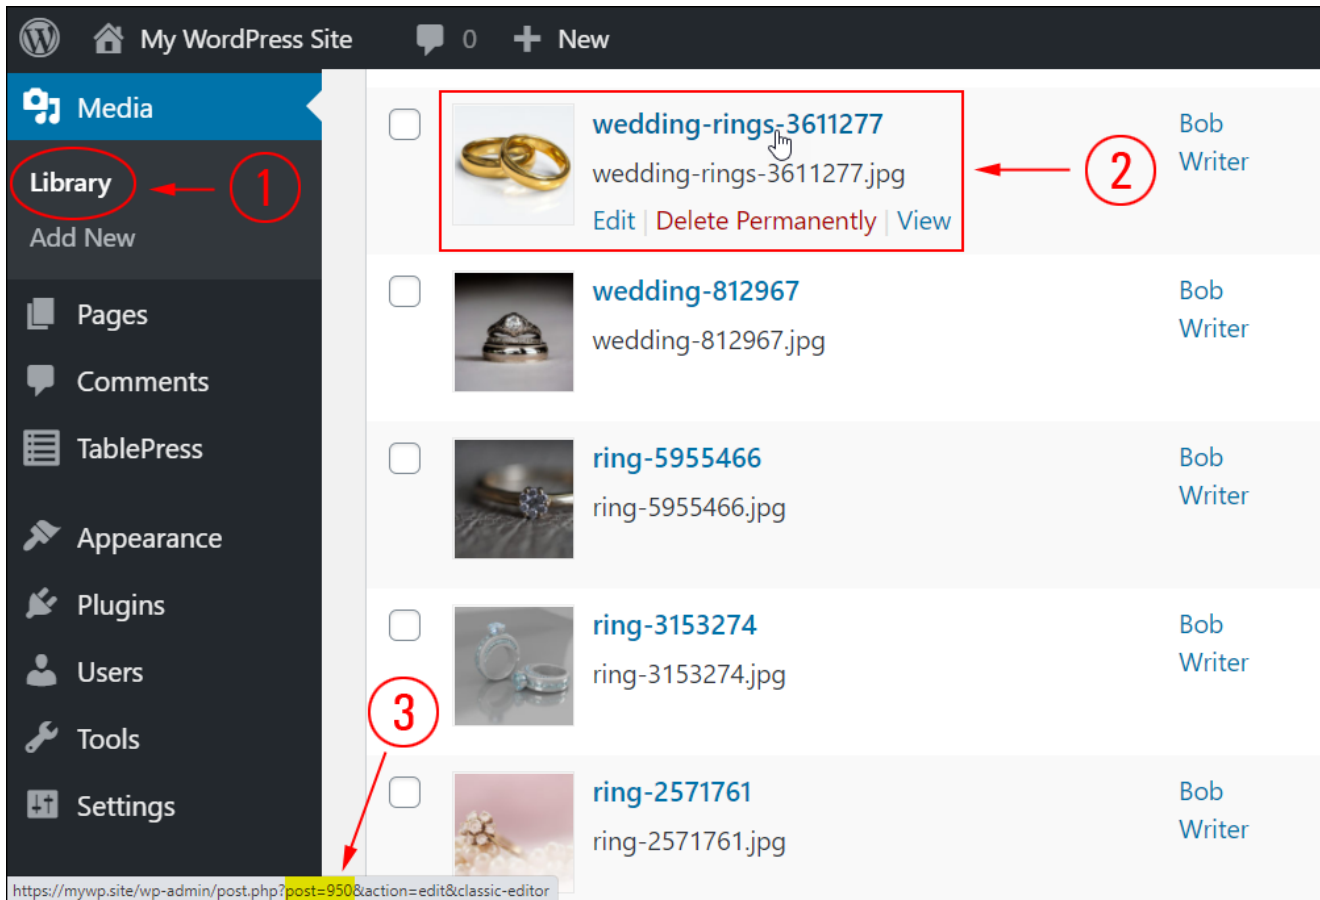

To display a specific image using the gallery shortcode, use the shortcode below with the selected image ID.

[gallery include = "950"]

Gallery Shortcode – Include.

To find your image ID, do the following:

1. Go to the **Media > Library**
2. Hover your mouse over an image
3. The ID is displayed after “post=” in the status bar at the bottom of your screen, as shown below...

How to find an image ID.

Add the shortcode where you want the image to appear in your content.

b i link b-quote del ins img ul ol li code Table more close tags

 malesuada tempor eget sit amet erat. In quis rutrum tortor. Fusce sed ex eleifend, loborti

Add the gallery shortcode with the single image ID to your content.

Your image will display when your post or page is published.

Notes:

- If a post exists with the ID specified in the gallery shortcode, the image gallery will display all images attached to that post.
- If the ID specified in the gallery shortcode belongs to an image and not a post, then the gallery will display the image with that ID.

In other words, the shortcode below works for posts and images (displays whichever of these matches the ID) ...

[gallery ids = "950"]

Gallery Shortcode – IDs

Whereas this shortcode applies only to image IDs:

[gallery include = "950"]

Gallery Shortcode – Include.

If publishing a single image using the gallery shortcode, remember to adjust other gallery settings (e.g. number of columns, image size, etc.)

The World's Most Desirable Jewelry Collection

February 7, 2021 | By Bob Writer

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vestibulum viverra porta nunc a pulvinar. Nunc ultricies ex eget tristique pulvinar. Aliquam quis iaculis mi. Donec vehicula augue lorem, vel aliquam libero lacinia ultrices.

Together...forever!

Nulla convallis, magna eget volutpat ullamcorper, sem risus varius tellus, ut ullamcorper sapien tortor at risus. Phasellus imperdiet risus sem, at egestas metus lobortis quis. Ut congue, odio quis rutrum eleifend, ipsum risus fermentum risus, id porttitor ligula eros vitae sem. Curabitur in commodo nulla, et maximus tortor.

An image gallery with a single image.

Additional Gallery Shortcode Options

You can customize your gallery using additional shortcode options, such as:

- columns
- id
- size
- link
- include
- exclude
- order by
- order
- itemtag

- contact
- captiontag

Let's go through some of the above gallery shortcodes using examples:

gallery columns

[gallery columns = "5"]

Gallery shortcode – gallery columns

The above shortcode lets you specify the number of columns you want your image gallery to display on your post or page.

Simply enter the number of columns inside the quotation marks. In the above example, we want our image gallery to display images in 5 columns.

The default value for this shortcode setting is 3. If columns are set to 0, no row breaks will be included.

gallery size

[gallery size = "medium"]

Gallery shortcode – gallery size.

You can use the shortcode above to display your images in different sizes: Thumbnail, Medium, Large, and Full Size.

Simply type in one of the options below inside the quotation marks (replacing the red text):

- thumbnail
- medium
- large
- full

gallery id

[gallery ids = "123"]

Gallery shortcode – gallery IDs.

We have already covered this shortcode.

The above shortcode allows you to display all images attached to a post with the specified ID. By default, if no ID is specified, the gallery will display all images attached to the current post.

If no post ID exists but the ID is assigned to an image, then the image with that ID will display in your gallery.

In the screenshot above, the gallery would display a single image with the image ID = 123 or all images attached to a post with ID 123.

If you need help understanding post, page, or image IDs, [see this tutorial](#).

gallery include

[gallery include = "951,950,949,948"]

Gallery shortcode – gallery include.

Use this shortcode to include multiple images in your gallery. Separate image IDs with commas.

gallery exclude

[gallery exclude = "47,95,249"]

Gallery shortcode – gallery exclude.

Like the “include” shortcode, you can *exclude* images that you don’t want to display in your image gallery by adding the above shortcode with comma-separated image IDs.

See the earlier section of this tutorial to learn how to identify image IDs in your media library.

gallery order

This lets you specify the sort order used to display thumbnails in your gallery shortcode:

- ASC (*ascending*)
- DESC (*descending*)

gallery orderby

This option lets you specify how to sort your display thumbnails.

By default, your image gallery uses “menu_order” to display images using the order you have specified when creating your gallery.

The options include:

- menu_order (*note: you can reorder the images by editing your image gallery*)
- title (*order by image title, as specified in the Media Library*)
- post_date (*sort images by date/time*)
- rand (*display images in random order*)
- ID (order images by ID)

You can combine **order** and **orderby** in a single shortcode. For example:

```
[gallery order = "DESC" orderby = "ID"]
```

Gallery shortcode with included parameters order and orderby.

The above shortcode will sort images by ID in descending order.

To sort images by date/time in ascending order, enter the shortcode below into your post or page:

```
[gallery order = "ASC" orderby = "post_date"]
```

Gallery shortcode – sort images in ascending order by date/time.

And to sort images by image title in ascending order, you would enter the following shortcode:

```
[gallery order = "ASC" orderby = "title"]
```

Gallery shortcode – sort images in ascending order by title.

You can have precise control of your image gallery by combining different parameters.

For example, here is the shortcode for displaying an image gallery on your post or page with the following parameters:

- Images link to media file location (*link="file"*)
- Image sizes display as Full size (*size="full"*)
- Images display in 4 columns (*columns="4"*)
- The gallery displays 7 images using their image IDs (*ids="comma-separated image ids"*)
- Images display in random order (*orderby="rand"*)

```
[gallery link="file" size="full" columns="4" ids="951,950,949,948,947,943,944" orderby="rand"]
```

Gallery shortcode with multiple parameters specified.

For more information about the Gallery shortcode, refer to the official WordPress Codex here: http://codex.wordpress.org/Gallery_Shortcode.

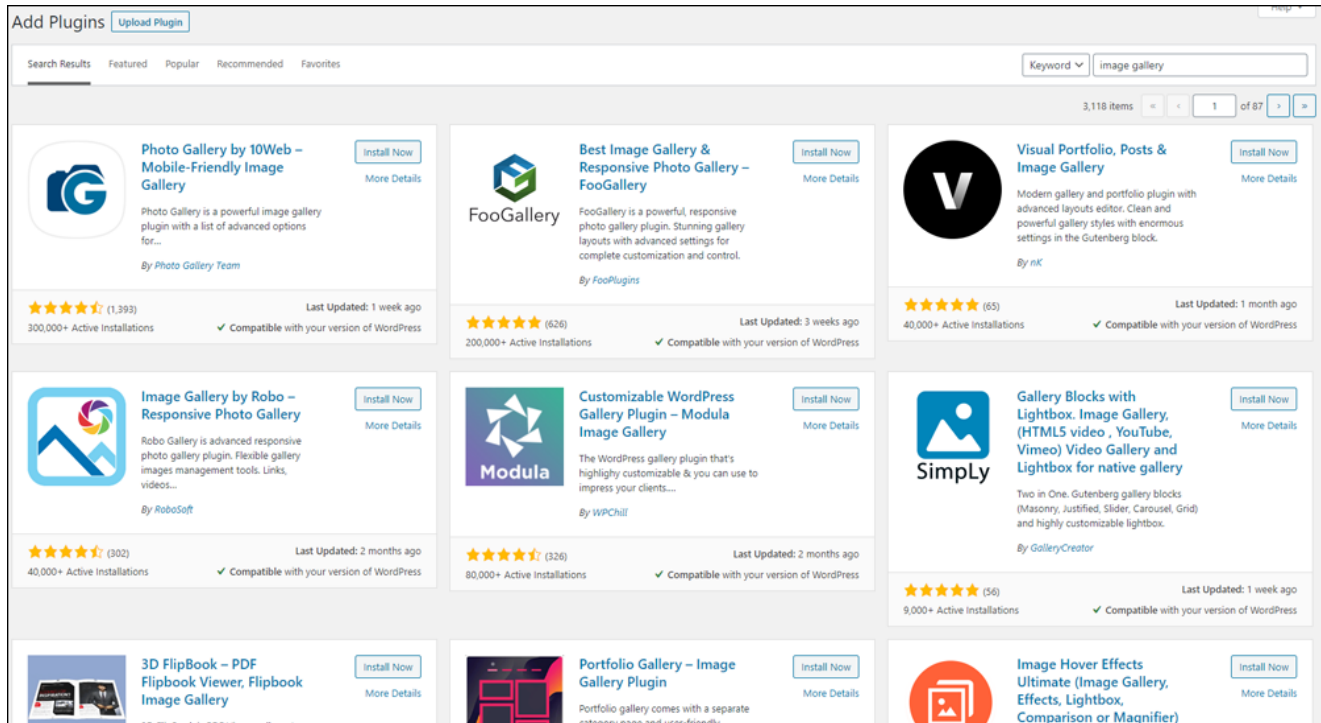

If you plan to add images to your posts using an image gallery, the built-in WordPress gallery feature may be more than ideal for your needs.

If you want to go beyond the default WordPress gallery, there are several plugins available that can help you create stunning image galleries.

You can either:

- Search for “WordPress image gallery plugins” inside your WordPress dashboard (**Plugins > Add New**), or
- Search for image gallery plugins in the WordPress free plugin directory here: [**WordPress Image Gallery Plugins**](#)

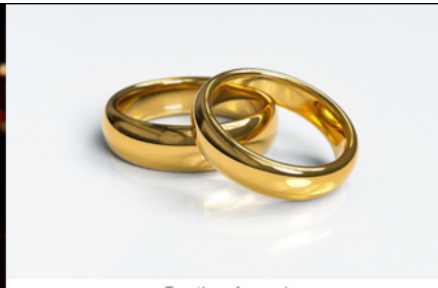

Search the WordPress plugin directory for image gallery plugins.

Congratulations! Now you know how to insert multiple images into your posts and pages using the built-in WordPress image gallery feature.
